I. On the Fructification of Neuropteris heterophylla, Brongniart. By Robert Kidston, F.R.S., L. and E., F.G.S. ............... page 1

VII. On the Structure of the Palaeozoic Seed Lagenostoma Lomaxi, with a Statement of the Evidence upon which it is referred to Lyginodendron. By F. W. Oliver, M.A., D.Sc., Quain Professor of Botany in University College, London, and D. H. Scott, M.A., Ph.D., F.R.S., Honorary Keeper of the Jodrell Laboratory, Royal Gardens, Kew. Page 193

VIII. Contributions to the Study of the Action of Sea-Snake Venoms. Part I. Venoms of Enhydrina vaalakadien and Enhydris curtus. By Sir Thomas R. Fraser, M.D., F.R.S., Professor of Materia Medica in the University of Edinburgh, and Major R. H. Elliot, I.M.S., on Special Duty for Snake Venom Research under the orders of the Secretary of State for India. 249

IX. On the Action of Wood on a Photographic Plate in the Dark. By William J. Russell, Ph.D., F.R.S. 281

XI. On the Action of the Venom Bungarus Coeruleus (the Common Krait). By Major R. H. Elliot, I.M.S.; W. C. Sillar, M.B., B.Sc., Lecturer on Experimental Pharmacology and Senior Assistant in the Materia Medica Department of the University of Edinburgh; and George S. Carmichael, M.D., University Assistant in the Materia Medica Department of the University of Edinburgh. Communicated by Professor Sir Thomas R. Fraser, M.D., F.R.S. 327

XII. Further Note on the Remains of Elephas Cypricotes from a Cave Deposit in Cyprus. By Dorothea M. A. Bate. Communicated by Dr. Henry Woodward, F.R.S. 347

Index to Volume 407
LIST OF ILLUSTRATIONS.

Plate 1.—Mr. R. Kidston on the Fructification of Neuropteris Heterophylla, Brongniart.

Plates 2 and 3.—Mr. H. H. Dale on the “Islets of Langerhans” in the Pancreas.

Plates 4–10.—Drs. Oliver and Scott on the Structure of the Palæozoic Seed, Lagenostoma Lomaxi.

Plates 11–18.—Dr. W. J. Russell on the Action of Wood on a Photographic Plate in the Dark.

Plates 19 and 20.—Mr. E. A. Newell Arber on the Fossil Flora of the Culm Measures of North-west Devon and the Palæobotanical Evidence with Regard to the Age of the Beds.

Plates 21 and 22.—Miss D. M. A. Bate on the Remains of Elephas Cypriotes from a Cave-Deposit in Cyprus.

ERRATUM.

Plate 16, Fig. 25.—For Rhizophora read Spruce.
ADVERTISEMENT.

The Committee appointed by the Royal Society to direct the publication of the Philosophical Transactions take this opportunity to acquaint the public that it fully appears, as well from the Council-books and Journals of the Society as from repeated declarations which have been made in several former Transactions, that the printing of them was always, from time to time, the single act of the respective Secretaries till the Forty-seventh Volume; the Society, as a Body, never interesting themselves any further in their publication than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the Transactions had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the public that their usual meetings were then continued, for the improvement of knowledge and benefit of mankind: the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future Transactions; which was accordingly done upon the 26th of March, 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts, or propriety of the reasonings contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body,
upon any subject, either of Nature or Art, that comes before them. And therefore the
thanks, which are frequently proposed from the Chair, to be given to the authors of
such papers as are read at their accustomed meetings, or to the persons through whose
hands they received them, are to be considered in no other light than as a matter of
civility, in return for the respect shown to the Society by those communications. The
like also is to be said with regard to the several projects, inventions, and curiosities of
various kinds, which are often exhibited to the Society; the authors whereof, or those
who exhibit them, frequently take the liberty to report, and even to certify in the
public newspapers, that they have met with the highest applause and approbation.
And therefore it is hoped that no regard will hereafter be paid to such reports and
public notices; which in some instances have been too lightly credited, to the
dishonour of the Society.
