INDEX

TO THE

PHILOSOPHICAL TRANSACTIONS.

SERIES B, VOL. 208.

A.

Agricultural yield, analyses of. Part III (Balls), 157.

B.

Bennettitean cones from British Cretaceous (Stöepe), 389.
Brains of identical twins, convolutional pattern of (Sano), 37.
Brownlee (J.). An Investigation into the Periodicity of Measles Epidemics in London from 1703 to the Present Day by the Method of the Periodogram, 226.

C.

Coal measures of South Staffordshire, fossil floras of (Amher), 127.
Cobra venom, action of (Oushny and Yagi), 1.
Cotton, environmental factors and yield of (Balls), 157.

E.

Enamel of Sparidae and Labridae, structure and development of (Mumby), 251.
Enamel-organ, cytomorphosis of marsupial, and relation to structure of completed enamel (Carter), 271.

I.

Ichthyosaurus, skull of, studied in serial sections (Sollas), 63.

VOL. CCVIII.—B. 3 O

[Published, November 30, 1918.]
INDEX.

M.

Measles epidemics in London, investigation into periodicity of, by the method of the periodogram (Brownlee), 225.

P.

Pancreas, pancreatic and hepatic ducts, development of, in Trichosurus (Tribe), 307.

S.

Skull, the fossil human, found at Talga, Queensland (Smith), 351.

Smith (S. A.). The Fossil Human Skull found at Talga, Queensland, 351.

Sollas (W. J.). The Skull of Ichthyosaurus, studied in Serial Sections, 63.

Stoves (M. C.). New Bennettitean Cones from the British Cretaceous, 389.

T.

Tribe (M.). The Development of the Pancreas, the Pancreatic and Hepatic Ducts, in Trichosurus vulpecula, 307. Trichosurus, development of pancreas, etc., in (Tribe), 307.

Y.

Yagi (S.). See Cushny and Yagi.
