List of Illustrations .................................... page v
Advertisement .................................................. vii

I. On the Action of Cobra Venom.—Parts I and II. By Arthur R. Cushey,
F.R.S., and S. Yagi, M.D. .................................. page 1

II. The Convolutional Pattern of the Brains of Identical Twins: a Study on
Hereditary Resemblance in the Fowlers of the Cerebral Hemispheres. By
F. Sano, M.D. (Brussels), Physician in Chief of the Asylum for Acute Mental
Cases at Antwerp (Belgium). Communicated by Prof. F. W. Mott,
F.R.S. .......................................................... 37

III. The Skull of Ichthyosaurus, Studied in Serial Sections. By W. J. Sollas,
F.R.S., Professor of Geology in the University of Oxford .......................... 63

IV. On the Fossil Floras of the Coal Measures of South Staffordshire. By
E. A. Newell Arber, M.A., Sc.D., F.G.S., Trinity College, Cambridge,
University Demonstrator in Paleobotany. Communicated by Prof. T.
McKenny Hughes, F.R.S. .................................... 127

V. Analyses of Agricultural Yield. Part III.—The Influence of Natural Environ-
mental Factors upon the Yield of Egyptian Cotton. By W. Lawrence
Balls, Sc.D., Late Fellow of St. John’s College, Cambridge. Communicated
by Dr. F. F. Blackman, F.R.S. ............................... 157
VI. An Investigation into the Periodicity of Measles Epidemics in London from 1703 to the Present Day by the Method of the Periodogram. By John Brownlee, M.D., D.Sc. Communicated by Dr. W. M. Fletcher, F.R.S. page 225

VII. On the Structure and Development of the Tubular Enamel of the Sparidae and Labridae. By J. Howard Mummery, D.Sc. (Hon.), Penn., M.R.C.S. Communicated by Prof. J. Symington, F.R.S. 251

IX. The Development of the Pancreas, the Pancreatic and Hepatic Ducts, in Trichosurus vulpecula. By Margaret Tribe, M.Sc. (Lond.), Percy MacGregor Research Scholar. Communicated by Prof. J. P. Hill, F.R.S. 307

X. The Fossil Human Skull Found at Talyai, Queensland. By Stewart Arthur Smith, M.B., Ch.M. Communicated by Prof. G. Elliot Smith, F.R.S. 351

Index to Volume 441
LIST OF ILLUSTRATIONS.

Plate 1.—Mr. W. J. Sollas on the Skull of Ichthyosaurus, Studied in Serial Sections.

Plates 2–4.—Mr. E. A. Newell Arber on the Fossil Floras of the Coal Measures of South Staffordshire.

Plates 5 and 6.—Mr. J. Howard Mummery on the Structure and Development of the Tubular Enamel of the Sparidæ and Labridæ.

Plates 7–10.—Mr. J. Thornton Carter on the Cytomorphosis of the Marsupial Enamel-Organ and its Significance in Relation to the Structure of the Completed Enamel.

Plate 11.—Miss Margaret Tribe on the Development of the Pancreas, the Pancreatic and Hepatic Ducts, in Trichosurus vulpecula.

Plates 12–18.—Mr. Stewart Arthur Smith on the Fossil Human Skull Found at Talga, Queensland.

Plates 19–24.—Miss Marie C. Stopes on New Bennettitean Cones from the British Cretaceous.
ADVERTISEMENT.

The Committee appointed by the Royal Society to direct the publication of the Philosophical Transactions take this opportunity to acquaint the public that it fully appears, as well from the Council-books and Journals of the Society as from repeated declarations which have been made in several former Transactions, that the printing of them was always, from time to time, the single act of the respective Secretaries till the Forty-seventh Volume; the Society, as a Body, never interesting themselves any further in their publication than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the Transactions had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the public that their usual meetings were then continued, for the improvement of knowledge and benefit of mankind: the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future Transactions; which was accordingly done upon the 26th of March, 1752. And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them: without pretending to answer for the certainty of the facts, or propriety of the reasonings contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body,
upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the Chair, to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they received them, are to be considered in no other light than as a matter of civility, in return for the respect shown to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public newspapers, that they have met with the highest applause and approbation. And therefore it is hoped that no regard will hereafter be paid to such reports and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.
