INDEX TO VOLUME 257 (B)

Ancestry of reptiles (Carroll), 267.

Auld, D. A. See Vallee, Riordan, Auld & Latt.

Baumber, M. E. See Bunn, Camerman, Liang, Moews & Baumber.

Berger, A. & Schechter, I. Mapping the active site of papain with the aid of peptide substrates and inhibitors (discussion), 240.

Bernhard, S. A. & Gutfreund, H. Steps in the reactions of proteolytic enzymes with their substrates (discussion), 105.

Bethge, P. H. See Lipscomb, Reeke, Hartsuck, Quiocia & Bethge.

Blow, D. M. See Birktoft, Blow, Henderson & Steitz.

Bradshaw, R. A. See Neurath, Bradshaw, Petra & Walsh.

Bunn, C. W., Camerman, N., Liang, Tung T'sai, Moews, P. C. & Baumber, M. E. X-ray diffraction studies of rennin crystals (discussion), 153.

Camerman, N. See Bunn, Camerman, Liang, Moews & Baumber.

Carboxypeptidase A—activation, chemical structure and molecular heterogeneity (discussion) (Neurath, Bradshaw, Petra & Walsh), 159.

Carroll, R. L. The ancestry of reptiles, 267.

Chemical approaches to the mode of action of carboxypeptidase A (discussion) (Vallee, Riordan, Auld & Latt), 215.

Chemical studies of porcine pepsin (discussion) (Keil), 125.

Concluding remarks to a discussion (Perutz), 265.

Contribution to a discussion (Neurath), 87.

Discussion on the structures and functions of proteolytic enzymes (Phillips, Blow, Hartley & Lowe), 83.

Electron microscopic study of terminal degeneration in the neocortex of the cat (Jones & Powell), 29.

Electron microscopic study of the laminar pattern and mode of termination of afferent fibre pathways in the somatic sensory cortex of the cat (Jones & Powell), 45.

Electron microscopy of the somatic sensory cortex of the cat. I. Cell types and synaptic organization (Jones & Powell), 1.

Electron microscopy of the somatic sensory cortex of the cat. II. The fine structure of layers I and II (Jones & Powell), 13.

Electron microscopy of the somatic sensory cortex of the cat. III. The fine structure of layers III to VI (Jones & Powell), 23.

Foltmann, B. The N-terminal and C-terminal amino acid sequence of calf rennin (discussion), 147.

Gutfreund, H. See Bernhard & Gutfreund.

Hartley, B. S. Homologies in serine proteinases (discussion), 77.

Hartsuck, Jean A. See Lipscomb, Reeke, Hartsuck, Quiocia & Bethge.

Henderson, R. See Birktoft, Blow, Henderson & Steitz.

Hodgkin, D. M. C. Introductory remarks to a discussion, 65.

Homologies in serine proteinases (discussion) (Hartley), 77.

Hydrogen-bond network at the active site of subtilisin BPN' (discussion) (Alden, Wright & Kraut), 119.

Introductory remarks to a discussion (Hodgkin), 65.

Jansonius, J. N. See Drenth, Jansonius, Koekoek, Sluyterman & Wolthers.

Jones, E. G. & Powell, T. P. S. An electron microscopic study of terminal degeneration in the neocortex of the cat, 29.
Jones, E. G. & Powell, T. P. S. An electron microscopic study of the laminar pattern and mode of termination of afferent fibre pathways in the somatic sensory cortex of the cat, 45.

Keil, B. Chemical studies of porcine pepsin (discussion), 125.

Koekoek, R. See Drenth, Jansonius, Koekoek, Sluyterman & Wolthers.

Kraut, J. See Alden, Wright & Kraut.

Latt, S. A. See Valle, Riordan, Auld & Latt.

Liang, Tung Ts'ai. See Bunn, Camerman, Liang, Moews & Baumber.

Lowe, G. The structure and mechanism of action of papain (discussion), 237.

McConkey, G. See Hess, McConnell, Ku & McConkey.

Mapping the active site of papain with the aid of peptide substrates and inhibitors (discussion) (Berger & Schechter), 249.

Mechanism of action of pepsin (discussion) (Knowles), 135.

Middle Pleistocene deposits at Mark's Tey, Essex (Turner), 373.

Moews, P. C. See Bunn, Camerman, Laing, Moews & Baumber.

Neurath, H., Bradshaw, R. A., Petra, P. H. & Walsh, K. A. Bovine carboxypeptidase A—activation, chemical structure and molecular heterogeneity (discussion), 159.

Neurath, H. Contribution to a discussion, 87.

Neurovenous tissues in cephalopods (Young), 399.

N-terminal and C-terminal amino acid sequence of calf rennin (discussion) (Foltmann), 147.

Perutz, M. F. Concluding remarks to a discussion, 265.

Petra, P. H. See Neurath, Bradshaw, Petra & Walsh.

Powell, T. P. S. See Jones & Powell.

Quiocho, F. A. See Lipscomb, Recke, Hartsuck, Quiocho & Bethge.

Recke, G. N., Jun. See Lipscomb, Recke, Hartsuck, Quiocho & Bethge.

Revision of the Jurassic reptile Hallopus victor (Marsh), with remarks on the classification of crocodiles (Walker), 329.

Riordan, J. F. See Valle, Riordan, Auld & Latt.

Schechter, I. See Berger & Schechter.

Shotton, D. M. & Watson, H. C. The three-dimensional structure of crystalline porcine pancreatic elastase (discussion), 111.

Sluyterman, L. A. A. See Drenth, Jansonius, Koekoek, Sluyterman & Wolthers.

Steitz, T. A. See Birkoft, Blow, Henderson & Steitz.

Steps in the reactions of proteolytic enzymes with their substrates (discussion) (Bernhard & Gutfreund), 105.

Structure and mechanism of action of papain (discussion) (Lowe), 237.

Structure of a-chymotrypsin (discussion) (Birkoft, Blow, Henderson & Steitz), 67.

Structure of carboxypeptidase A'. VIII. Atomic interpretation at 0-2 nm resolution, a new study of the complex of glycyl-L-tyrosine with CPA, and mechanistic deductions (discussion) (Lipscomb, Recke, Hartuck, Quiocho & Bethge), 159.

Structure of the papain molecule (discussion) (Drenth, Jansonius, Koekoek, Sluyterman & Wolthers), 231.

Studies of the activity of chymotrypsin (discussion) (Hess, McConnell, Ku & McConkey), 89.
Index

Three-dimensional structure of crystalline porcine pancreatic elastase (discussion) (Shotton & Watson), 111.

Turner, G. The Middle Pleistocene deposits at Mark's Tey, Essex, 373.

Vallee, B. L., Riordan, J. F., Auld, D. A. & Latt, S. A. Chemical approaches to the mode of action of carboxypeptidase A (discussion), 215.

Walker, A. D. A revision of the Jurassic reptile Hallopus victor (Marsh), with remarks on the classification of crocodiles, 323.

Walsh, K. A. See Neurath, Bradshaw, Petra & Walsh.

Wolthers, P. G. See Drenth, Jansonius, Kockoek, Sluyterman & Wolthers.

Wright, C. S. See Alden, Wright & Kraut.

X-ray diffraction studies of rennin crystals (discussion) (Bunn, Camerman, Liang, Moews & Baumber), 153.

Young, J. Z. Neurovenous tissues in cephalopods, 309.
