A Discussion on structural and functional aspects of plasticity in the nervous system

Organized by H. B. Barlow, F.R.S. and R. M. Gaze, F.R.S.
NOTICE TO CONTRIBUTORS TO
PROCEEDINGS AND PHILOSOPHICAL TRANSACTIONS
OF THE ROYAL SOCIETY

The Royal Society welcomes suitable communications for publication in its scientific journals: papers estimated to occupy up to 24 printed pages are considered for the *Proceedings* and longer papers and those with numerous or large illustrations for the *Philosophical Transactions*.

Detailed advice on the preparation of papers to be submitted to the Society is given in a leaflet available from the Executive Secretary, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG. The ‘Instructions to authors’ are also printed in every fifth volume of the *Proceedings* A and B (volume numbers ending in 0 or 5). The basic requirements are: a paper should be as concise as its scientific content allows and grammatically correct; standard nomenclature, units and symbols should be used; the text (including the abstract, the list of references and figure descriptions) should be in double spaced typing on one side of the paper; any diagrams should be drawn in a size to permit blockmaking at a reduction to about one half linear, the lettering being inserted not on the original drawings but on a set of copies; where photographs are essential the layout should be designed to give the most effective presentation.

The initial submission of a paper should normally be through a Fellow or Foreign Member of the Society, but papers may be submitted direct to the Executive Secretary. The latest lists of Fellows and Foreign Members are to be found in the current edition of the *Year Book of the Royal Society*. In the event of any difficulty, an author is invited to send the paper direct to the Executive Secretary.

No page charge is levied, and the first 50 offprints of a paper are supplied to the author gratis.

A DISCUSSION ON STRUCTURAL AND FUNCTIONAL ASPECTS OF PLASTICITY IN THE NERVOUS SYSTEM

Organized by H. B. Barlow, F.R.S. and R. M. Gaze, F.R.S.

(Discussion held 4 and 5 December 1975 – typescripts received 25 May 1976)

[22 plates]

CONTENTS

H. B. Barlow, F.R.S. and R. M. Gaze, F.R.S.
Introductory remarks 243

P. Rakic
Prenatal development of the visual system in rhesus monkey 245

J. E. Cook and T. J. Horder
The multiple factors determining retinotopic order in the growth of optic fibres into the optic tectum 261

M. J. Keating
Evidence for plasticity of intertectal neuronal connections in adult Xenopus 277
Discussion: G. Melvill Jones 294

A. J. Buller and R. Pope
Plasticity in mammalian skeletal muscle 295
Discussion: G. Melvill Jones, D. M. Lewis 305

S. P. R. Rose
Early visual experience, learning, and neurochemical plasticity in the rat and the chick 307

G. Melvill Jones
Plasticity in the adult vestibulo-ocular reflex arc 319
Discussion: R. L. Gregory 334

B. R. Genat and R. F. Mark
Electrophysiological experiments on the mechanism and accuracy of neuromuscular specificity in the axolotl 335
Discussion: J. Diamond 347

G. Raisman
Formation of synapses in the adult rat after injury: similarities and differences between a peripheral and a central nervous site 349

Vol. 278. B 961. 18 [Published 26 April 1977]
P. D. Wall
The presence of ineffective synapses and the circumstances which unmask them
Discussion: J. H. Wolstencroft
361

H. Van der Loos
Structural changes in the cerebral cortex upon modification of the periphery:
barrels in somatosensory cortex
373

D. H. Hubel, T. N. Wiesel and S. LeVay
Plasticity of ocular dominance columns in monkey striate cortex
377

K.-P. Hoffmann and M. Cynader
Functional aspects of plasticity in the visual system of adult cats after early
monocular deprivation
411

C. Blakemore
Genetic instructions and developmental plasticity in the kitten's visual cortex
Discussion: G. Melvill Jones
425

J. Z. Young, F.R.S.
Concluding remarks
