Evolutionary systematics of bivalve molluscs

A Discussion organized for the Royal Society and the Malacological Society of London by Sir Maurice Yonge, F.R.S., and T. E. Thompson

PUBLISHED BY THE ROYAL SOCIETY
6 CARLTON HOUSE TERRACE LONDON SW1Y 5AG
NOTICE TO CONTRIBUTORS TO
PROCEEDINGS AND PHILOSOPHICAL TRANSACTIONS
OF THE ROYAL SOCIETY

The Royal Society welcomes suitable communications for publication in its scientific journals: papers estimated to occupy up to 24 printed pages are considered for the Proceedings and longer papers and those with numerous or large illustrations for the Philosophical Transactions.

Detailed advice on the preparation of papers to be submitted to the Society is given in a leaflet available from the Executive Secretary, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG. The ‘Instructions to authors’ are also printed in every fifth volume of the Proceedings A and B (volume numbers ending in 0 or 5). The basic requirements are: a paper should be as concise as its scientific content allows and grammatically correct; standard nomenclature, units and symbols should be used; the text (including the abstract, the list of references and figure descriptions) should be in double spaced typing on one side of the paper; any diagrams should be drawn in a size to permit blockmaking at a reduction to about one half linear, the lettering being inserted not on the original drawings but on a set of copies; where photographs are essential the layout should be designed to give the most effective presentation.

The initial submission of a paper must be through a Fellow or Foreign Member of the Society, but subsequent correspondence will be conducted direct with the author. The latest lists of Fellows and Foreign Members are to be found in the current edition of the Year Book of the Royal Society. In the event of any difficulty, an author is invited to seek the assistance of the Executive Secretary.

No page charge is levied, and the first 50 offprints of a paper are supplied to the author gratis.

The Editors particularly welcome short communications to Proceedings; as far as possible they will be given expeditious treatment both in consideration and in printing, and this will be facilitated if a paper is submitted with a firm recommendation by a Fellow.

EVOLUTIONARY SYSTEMATICS OF BIVALVE MOLLUSCS

A Discussion organized for the Royal Society and the Malacological Society of London by Sir Maurice Yonge, F.R.S., and T. E. Thompson

(Discussion held 18 and 19 May 1977 – Typescript received 3 March 1978)

[Twenty-nine plates]

CONTENTS

C. M. Yonge, F.R.S.
Introductionary remarks

N. D. Newell and D. W. Boyd
A palaeontologist’s view of bivalve phylogeny
Discussion: R. M. C. Eagar

O. A. Scarlato and Y. I. Starobogatov
Phylogenetic relations and the early evolution of the Class Bivalvia

J. Pajeta
The origin and early taxonomic diversification of pelecypods
Discussion: E. L. Yochelson and M. D. Brasier

S. M. Stanley
Aspects of the adaptive morphology and evolution of the Trigoniidae
Discussion: T. R. Waller

N. J. Morris
The infaunal descendants of the Cycloconchidae: an outline of the evolutionary and taxonomy of the Heteroconchia, superfamilies Cycloconchacea to Chamaacea
Discussion: R. M. C. Eagar

E. G. Kauffman
Evolutionary rates and patterns among Cretaceous Bivalvia

P. W. Skelton
The evolution of functional design in rudists (Hippuritacea) and its taxonomic implications

B. Runnegar
Origin and evolution of the Class Rostroconchia
Discussion: C. B. Goodhart and E. L. Yochelson

Vol. 284. B. 1001. 16 [Published 16 November 1978]
R. D. K. Thomas
   Limits to opportunism in the evolution of the Arcoidia (Bivalvia)  335

T. R. Waller
   Morphology, morphoclines and a new classification of the Pteriomorphia
   (Mollusca: Bivalvia)  345
   Discussion: E. L. Yochelson  365

J. G. Carter and M. J. S. Tevesz
   The shell structure of Psychodesma (Cyrtodontidae; Bivalvia) and its bearing
   on the evolution of the Pteriomorphia  367

C. M. Yonge, F.R.S.
   Significance of the ligament in the classification of the Bivalvia [summary only]  375

G. Owen
   Classification and the bivalve gill  377

J. A. Allen
