INDEXES TO VOLUME 288 (B)

Author index

Air, G. M. See Laver, Air, Webster, Gerhard, Ward & Dopheide.
Almond, J. W. See Inglis & Almond.

Baez, M. See Palese, Racaniello, Desselberger, Young & Baez.

Barltrop, D. Geochemical and man-made sources of lead and human health, 205.

Barrett, T. See Mahy, Barrett, Briedis, Brownson & Wolstenholme.

Bean, W. J. See Webster, Hinshaw, Bean & Sriram.

Betts, R. F. See Murphy, Markoff, Chanock, Spring, Maassab and others.

Bouloy, Michele. See Krug, Bouloy & Plotch.

Braithwaite, C. J. R. The petrology of oolitic phosphorites from Esprit (Aldabra), western Indian Ocean, 511.

Brownson, J. M. See Mahy, Barrett, Briedis, Brownson & Wolstenholme.

Cate Jr, T. R. See Murphy, Markoff, Chanock, Spring, Maassab and others.

Cawse, P. A. See Peirson & Cawse.

Choppin, P. W. See Lamb & Choppin.

Couch, R. B. See Murphy, Markoff, Chanock, Spring, Maassab and others.

Cox, Nancy J. See Murphy, Markoff, Chanock, Spring, Maassab and others.

Desselberger, U. See Palese, Racaniello, Desselberger, Young & Baez.

Dopheide, T. A. A. See Laver, Air, Webster, Gerhard, Ward & Dopheide.

Easterday, B. C. Animals in the influenza world, 433.

Gerhard, W. See Laver, Air, Webster, Gerhard, Ward & Dopheide.

Ghendon, Y. Z. & Markushin, S. G. Studies on mutation lesions and physiology of fowl plague virus ts mutants, 383.

Hayshin, V. S. See Webster, Hinshaw, Bean & Sriram.

Howarth, R. J. See Webb & Howarth.

Hoyle, G. & Williams, Melissa. The musculature of Peripatus and its innervation, 481.

Kemp, T. S. The primitive cynodont Prognathosuchus: structure, function and evolution of the postcranial skeleton, 217.

Kendal, A. P. See Murphy, Markoff, Chanock, Spring, Maassab and others.

Kilbourne, E. D. Influenza: viral determinants of the pathogenicity and epidemicity of an invariant disease of variable occurrence, 291.

Koivastsky, V. V. Geochemical ecology and problems of health, 185.

Levine, M. M. See Murphy, Markoff, Chanock, Spring, Maassab and others.

Maassab, H. F. See Murphy, Markoff, Chanock, Spring, Maassab and others.

Mahy, B. W. J., Barrett, T., Briedis, D. J., Brownson, J. M. & Wolstenholme, A. J. Influence of the host cell on influenza virus replication, 349.

Markoff, L. J. See Murphy, Markoff, Chanock, Spring, Maassab and others.

Markushin, S. G. See Ghendon & Markushin.

Masironi, R. Geochemistry and cardiovascular diseases, 193.

Miller, J. & Clarkson, E. N. K. The post-ecdysial development of the cuticle and the eye of the Devonian Trilobite Phacops rana milleri Stewart 1927, 461.

Mills, C. F. Trace elements in animals, 51.

Moore, P. J. See Plant & Moore.

Moynahan, E. J. Trace elements in man, 65.

Pereira, Marguerite S. The effects of shifts and drifts on the epidemiology of influenza in man, 423.

Peterson, P. J. Geochemistry and ecology, 169.

Plant, Jane & Moore, P. J. Regional geochemical mapping and interpretation in Britain, 95.

Plotch, S. J. See Krug, Bouloy & Plotch.

Racaniello, V. R. See Palese, Racaniello, Desselberger, Young & Baez.

Robertson, J. S. Nucleotide sequences from the terminal regions of fowl plague virus genome RNA, 371.

Rott, R. Genetic determinants for infectivity and pathogenicity of influenza viruses, 393.

Shaper, A. G. Epidemiology for geochemists, 127.

Spring, Susan B. See Murphy, Markoff, Chanock, Spring, Maassab and others.

Sriram, G. See Webster, Hinshaw, Bean & Sriram.

Thornton, I. & Webb, J. S. Geochemistry and health in the United Kingdom, 151.

Tourtelot, H. A. Geochemical surveys in the United States in relation to health, 113.

Tyrrell, D. A. J. Influenza vaccines, 449.

Waterfield, M. D. See Skehel, Waterfield, McCauley, Elder & Wiley.

Webb, J. S. & Howarth, R. J. Regional geochemical mapping, 81.

Webster, R. G. See Laver, Air, Webster, Gerhard, Ward & Dopheide.

Webster, R. G., Hinshaw, V. S., Bean, W. J. & Sriram, G. Influenza viruses: transmission between species, 439.

Williams, Melissa. See Hoyle & Williams.

Wilson, A. L. Trace metals in waters, 25.

Wixson, B. G. Geochemistry and pollution, 179.

Wolstenholme, A. J. See Mahy, Barrett, Briedis, Brownson & Wolstenholme.

Young, J. See Palese, Racaniello, Desselberger, Young & Baez.
Subject index

Aldabra: oolitic phosphorites, 511.

Discussion on environmental geochemistry and health; for detailed contents see pp. 1 and 2.
Discussion on influenza; for detailed contents see pp. 287 and 288.

Eye and cuticle development after ecdysis – Phacops rana milleri, 461.

Influenza, Discussion; for detailed contents see pp. 287 and 288.

Innervation of Peripatus muscle, 481.

Leicestershire, Quaternary geology, 259.

Musculature of Peripatus, 481.

Phacops rana milleri – post-ecdysial development, 461.

Phosphate: oolites from Aldabra, 511.

Procynosuchus: structure, function and evolution of the postcranial skeleton, 217.

Quaternary geology, 259.

End of the two hundred and eighty-eighth volume – Series B
CONTENTS
Series B  Volume 288

No. 1026  11 December 1979
Environmental geochemistry and health
    A Discussion organized by S. H. U. BOWIE, F.R.S., and J. S. WEBB. (Eight plates)  page 1

No. 1027  7 January 1980
The primitive cynodont *Procynosuchus*: structure, function and evolution of the post-
cranial skeleton
    By T. S. KEMP. (Plates 1 and 2) ................................................... 217

No. 1028  7 January 1980
The Quaternary deposits of western Leicestershire
    By T. D. DOUGLAS .................................................................................. 259

No. 1029  25 February 1980
Influenza
    A Discussion organized by D. A. J. TYRRELL, F.R.S., and H. G. PEREIRA, F.R.S.
    (Four plates) ......................................................................................... 287

No. 1030  25 February 1980
The post-ecdysial development of the cuticle and the eye of the Devonian trilobite
    *Phacops rana milleri* Stewart 1927
    By J. MILLER and E. N. K. CLARKSON. (Plates 1–7) ......................... 461

No. 1031  25 February 1980
The musculature of *Peripatus* and its innervation
    By G. HOYLE and MELISSA WILLIAMS. (Plates 1–24) ................. 481

No. 1032  7 May 1980
The petrology of oolitic phosphorites from Esprit (Aldabra), western Indian Ocean
    By G. J. R. BRATHWAITE. (Plates 1–7) .................................................. 511

Kathleen Lonsdale

*A biographical memoir by
Dorothy M. C. Hodgkin, O.M., F.R.S.*

Born in the year the Wright brothers first flew an aeroplane, Kathleen Lonsdale lived long enough to see moon-landings appear almost commonplace. The problems attendant on such spectacular advances in science and technology were among her most constant preoccupations, because she felt that scientists do have a special responsibility to try to ensure that science as a whole is rightly used.

This account of her life includes a complete bibliography of her scientific works, her own list of her travels abroad, and a note of her more substantial non-scientific publications.

Dorothy Hodgkin, the first Englishwoman to win a Nobel Prize, and the first one since Florence Nightingale to belong to the Order of Merit, is herself a distinguished crystallographer well known for her active interest in social problems and international affairs, and was the obvious choice to prepare this sympathetic appraisal of Kathleen Lonsdale's life and work.

P. M. S. Blackett

*A biographical memoir*

This outstanding Memoir, written by Sir Bernard Lovell for the Royal Society, describes the career of one of the most remarkable men of his generation, Lord Blackett, President of the Royal Society 1965–70, a peer among scientists, a thinker of great originality in military matters, a radical in politics and a man with a passionate concern for the underprivileged.

Sir Bernard shows how Blackett, trained as a naval officer and serving in World War I, became a scientist at Cambridge under Rutherford and achieved international fame in three fields of physics, atomic disintegrations, cosmic rays and palaeomagnetism, becoming a Nobel Laureate in 1948.

Sir Bernard Lovell, as a personal friend and colleague for 40 years, was in a unique position to observe events and he has written a Memoir of absorbing interest. The many facets of the life and work of Blackett brought out here surely indicate that he will find a place as one of the great men of the twentieth century.
