Crop protection chemicals: directions of future development

A Discussion organized by
L. Fowden, F.R.S., and I. J. Graham-Bryce

PUBLISHED BY THE ROYAL SOCIETY
6 CARLTON HOUSE TERRACE LONDON SW1Y 5AG
The Royal Society welcomes suitable communications for publication in its scientific journals: papers estimated to occupy up to 24 printed pages are considered for the Proceedings and longer papers and those with numerous or large illustrations for the Philosophical Transactions.

Detailed advice on the preparation of papers to be submitted to the Society is given in a leaflet available from the Executive Secretary, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG. The ‘Instructions to authors’ are also printed in every fifth volume of the Proceedings A and B (volume numbers ending in 0 or 5). The basic requirements are: a paper should be as concise as its scientific content allows and grammatically correct; standard nomenclature, units and symbols should be used; the text (including the abstract, the list of references and figure descriptions) should be in double spaced typing on one side of the paper. A leaflet giving detailed advice on the preparation of illustrations is available from the Executive Secretary; diagrams should be expertly drawn at about twice the proposed final size, preferably with lettering in the correct style but if this is not possible the lettering should be inserted not on the original drawings but on a set of copies; where photographs are essential the layout should be designed to give the most effective presentation.

The initial submission of a paper must be through a Fellow or Foreign Member of the Society, but subsequent correspondence will be conducted direct with the author. The latest lists of Fellows and Foreign Members are to be found in the current edition of the Year Book of the Royal Society. A copy of ‘Notes for the guidance of Fellows communicating papers’ is available from the Executive Secretary. In the event of any difficulty, an author is invited to seek the assistance of the Executive Secretary.

No page charge is levied, and the first 50 offprints of a paper are supplied to the author gratis.

The Editors particularly welcome short communications to Proceedings; as far as possible they will be given expeditious treatment both in consideration and in printing, and this will be facilitated if a paper is submitted with a firm recommendation by a Fellow.

CROP PROTECTION CHEMICALS: DIRECTIONS OF FUTURE DEVELOPMENT

A DISCUSSION ORGANIZED BY
L. FOWDEN, F.R.S., AND I. J. GRAHAM-BRYCE

(Discussion held 18 and 19 February 1981 – Typescripts received 14 April 1981)

CONTENTS

1. INTRODUCTION

L. FOWDEN, F.R.S.
Introductory remarks

I. J. GRAHAM-BRYCE
The current status and future potential of chemical approaches to crop protection
Discussion: J. H. STEVENSON

T. R. E. SOUTHWOOD, F.R.S.
Environmental considerations [summary only]

J. T. BRAUNHOLTZ
Crop protection: the role of the chemical industry in an uncertain future
Discussion: C. WALL, R. J. CREMLYN

2. SCOPE FOR, AND APPROACH TO, DISCOVERY OF NEW AGENTS

(a) CONVENTIONAL ‘LETHAL’ ACTIVITY

R. S. MORROD
Lead generation: designing the right approach

A. VERLOOP
Lead optimization: quantitative structure–activity relations

(b) ALTERNATIVE CHEMICAL AGENTS

J. J. MENN AND C. A. HENRICK
Rational and biorational design of pesticides

R. BAKER AND C. LONGHURST
Chemical control of insect behaviour

P. LANGCAKE
Alternative chemical agents for controlling plant disease
Discussion: J. A. IRVINE, M. J. JEGER

R. J. CHANCELLOR
The manipulation of weed behaviour for control purposes

Vol. 295. B 1076

[Published 23 September 1981]
