Interferon: twenty-five years on

A Discussion organized and edited by

D. A. J. Tyrrell, F.R.S., and D. C. Burke

PUBLISHED BY THE ROYAL SOCIETY
6 CARLTON HOUSE TERRACE LONDON SW1Y 5AG
PROCEEDINGS AND PHILOSOPHICAL TRANSACTIONS
OF THE ROYAL SOCIETY

Notice to contributors

The Royal Society welcomes suitable communications for publication in its scientific journals: papers estimated to occupy up to 24 printed pages are considered for the Proceedings and longer papers and those with numerous or large illustrations for the Philosophical Transactions.

Detailed advice on the preparation of papers to be submitted to the Society is given in a leaflet available from the Executive Secretary, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG. The ‘Instructions to authors’ are also printed in every fifth volume of the Proceedings A and B (volume numbers ending in 0 or 5). The basic requirements are: a paper should be as concise as its scientific content allows and grammatically correct; standard nomenclature, units and symbols should be used; the text (including the abstract, the list of references and figure descriptions) should be in double spaced typing on one side of the paper. A leaflet giving detailed advice on the preparation of illustrations is available from the Executive Secretary; diagrams should be expertly drawn at about twice the proposed final size, preferably with lettering in the correct style but if this is not possible the lettering should be inserted not on the original drawings but on a set of copies; where photographs are essential the layout should be designed to give the most effective presentation.

The initial submission of a paper must be through a Fellow or Foreign Member of the Society, but subsequent correspondence will be conducted direct with the author. The latest lists of Fellows and Foreign Members are to be found in the current edition of the Year Book of the Royal Society. A copy of ‘Notes for the guidance of Fellows communicating papers’ is available from the Executive Secretary. In the event of any difficulty, an author is invited to seek the assistance of the Executive Secretary.

No page charge is levied, and the first 50 offprints of a paper are supplied to the author gratis.

The Editors particularly welcome short communications to Proceedings; as far as possible they will be given expeditious treatment both in consideration and in printing, and this will be facilitated if a paper is submitted with a firm recommendation by a Fellow.

Associate Editors: series B, Biological Sciences
(For Standing Orders see current Year Book.)

Lord Adrian          Dr F. W. Campbell          Professor H. W. Kosterlitz

SYNOPSISES FROM THE POSTER EXHIBITION ORGANIZED BY I. M. KERR

1. Interferon: a tertiary structure predicted from amino acid sequences
   (M. J. E. STERNBERG AND F. E. COHEN)

2. Inhibition of hepatitis B viral replication by lymphoblastoid interferon
   (I. V. D. WELLER, M. J. F. FOWLER, J. MONJARDINO, V. CARRENO,
   H. C. THOMAS AND SHEILA SHERLOCK)

3. Morphological parameters of the effect of interferon on mouse peritoneal
   macrophages (M. DEGRÉ, H. ROLLAG AND ELISABETH KJELDSBERG)

4. The effect of interferon on the expression of human cell-surface antigens
   (O. R. BURRONE AND C. MILSTEIN, F.R.S.)

5. Analysis of antiviral state in RD114 and A204 cells after interferon treatment
   (Y. TOMITA, J. NISHIMAKI, F. TAKAHASHI AND T. KUWATA)

6. Interferon restriction of target organs for lymphocytic choriomeningitis
   virus-induced T lymphocytes may be lethal (C. J. PFAU, R. M. FRIEDMAN
   AND J. K. VALENTI)

7. Fatty acid desaturation-promoting factor (DPF) induced by interferon
   (K. APSTOLOV AND W. BARKER)

8. Altered Natural Killer cell response in patients with malignant lymphoma
   (CATHERINE M. HAWRYLOWICZ, R. C. REES, C. W. POTTER
   AND B. W. HANCOCK)
