FOOD TECHNOLOGY
IN THE 1980s

This Royal Society symposium on ‘food technology in the 1980s’ recognized the important contribution food science and technology has made so far to the feeding of our ever growing urban population. A truly interdisciplinary scientific approach is needed encompassing among others nutrition, biochemistry, microbiology and physical chemistry to advance the multitude of processing and preservation techniques, satisfying at the same time the socio-economic, toxicological, and legal constraints placed on any completely new or improved technology today and more so in the future.

The innovative culinary art and craft of great chefs of the 19th century has moved from the restaurant to the food factory. All the large-scale processing techniques discussed must therefore satisfy the visual, olfactory, gustatory and tactile human senses to find consumer acceptability. Added to this must be suitable transport and storage conditions as a vital part in the chain linking food all the way from being grown on the farm via the processor and distributor to the household table.

Every aspect of this food chain is reviewed and discussed in this book.

CONTENTS OF VOLUME 300 (SERIES B)

No. 1098 On the stochastic properties of bursts of single ion channel openings and of clusters of bursts
By D. Colquhoun and A. G. Hawkes

The ornithodolite: an instrument for collecting large samples of bird speed measurements
By C. J. Pennycuick

The flight of petrels and albatrosses (Procellariiformes), observed in South Georgia and its vicinity
By C. J. Pennycuick

£13.45

No. 1099 Cell membranes and glycoprotein synthesis
A Discussion organized and edited by
D. H. Northcote, F.R.S. [Three plates]

£17.35

No. 1100 Industrial and diagnostic enzymes
A Discussion organized and edited by
B. S. Hartley, F.R.S., T. Atkinson and M. D. Lilly

£24.60

No. 1101 Nanoplankton from the Galapagos Islands: two genera of spectacular Coccolithophorids (Ophiaster and Calciopappus), with special emphasis on unmineralized periplast components
By Irene Manton, F.R.S., and K. Oates.
[Plates 1–8]

Observations on the morphology and behaviour of Chinina flau cosa Gray (Chilinidae), with a discussion on the early evolution of pulmonate gastropods
By R. C. Brace

The cardiac innervation of Eledone cirrhosa (Lamarck) (Mollusca: Cephalopoda)
By P. J. S. Smith and P. R. Boyle.
[Plates 1–4]

The ecological impact of the sea urchin Paracentrotus lividus (Lamarck) in Lough Ine, Ireland
By J. A. Kitching, F.R.S., and Vivien M. Thain

£19.55

No. 1102 Emeraldaella and Leachhoilia, two arthropods from the Burgess Shale, Middle Cambrian, British Columbia
