Notice to contributors

The Royal Society welcomes suitable communications for publication in its scientific journals: papers estimated to occupy up to 24 printed pages are considered for the Proceedings and longer papers and those with numerous or large illustrations for the Philosophical Transactions.

Detailed advice on the preparation of papers to be submitted to the Society is given in a leaflet available from the Executive Secretary, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG. The 'Instructions to authors' are also printed in every fifth volume of the Proceedings A and B (volume numbers ending in 0 or 5). The basic requirements are: a paper should be as concise as its scientific content allows and grammatically correct; standard nomenclature, units and symbols should be used; the text (including the abstract, the list of references and figure descriptions) should be in double spaced typing on one side of the paper. A leaflet giving detailed advice on the preparation of illustrations is available from the Executive Secretary; diagrams should be expertly drawn at about twice the proposed final size, preferably with lettering in the correct style but if this is not possible the lettering should be inserted not on the original drawings but on a set of copies; where photographs are essential the layout should be designed to give the most effective presentation.

The initial submission of a paper must be through a Fellow or Foreign Member of the Society, but subsequent correspondence will be conducted direct with the author. The latest lists of Fellows and Foreign Members are to be found in the current edition of the Year Book of the Royal Society. A copy of 'Notes for the guidance of Fellows communicating papers' is available from the Executive Secretary. In the event of any difficulty, an author is invited to seek the assistance of the Executive Secretary.

No page charge is levied, and the first 50 offprints of a paper are supplied to the author gratis.

The Editors particularly welcome short communications to Proceedings; as far as possible they will be given expeditious treatment both in consideration and in printing, and this will be facilitated if a paper is submitted with a firm recommendation by a Fellow.

NOCICEPTION AND PAIN

A Discussion organized and edited by
A. IGO, F.R.S., L. L. IVERSEN, F.R.S., and F. CERVERO

(Discussion held 24 and 25 May 1984 – Typescripts received 12 September 1984)

[Seven plates]

CONTENTS

NOCICEPTIVE MECHANISMS

P. W. NATHAN
Pain and nociception in the clinical context 219

E. TOREBJÖRK
Nociceptor activation and pain 227

A. IGO, F.R.S., WILMA M. STEEDMAN AND SUSAN FLEETWOOD-WALKER
Spinal processing: anatomy and physiology of spinal nociceptive mechanisms 235

W. D. WILLIS
Nociceptive pathways: anatomy and physiology of nociceptive ascending pathways 253

Discussion on the session on nociceptive mechanisms: report by A. G. BROWN 269

NEUROCHEMISTRY OF NOCICEPTION

T. M. JESSELL AND J. DODD
Structure and expression of differentiation antigens on functional subclasses of primary sensory neurons 271

S. P. HUNT AND J. ROSSI
Peptide- and non-peptide-containing unmyelinated primary afferents: the parallel processing of nociceptive information 283

H. W. KOSTERLITZ, F.R.S., AND S. J. PATerson
Types of opioid receptors: relation to antinociception 291

V. HÖLLT, PILAR SANCHEZ-BLAZQUEZ AND J. GARZON
Multiple opioid ligands and receptors in the control of nociception 299

Discussion on the session on neurochemistry of nociception: report by M. GOEDERT 311
CONTENTS

NOCICEPTIVE SYSTEMS

B. Matthews
   Peripheral and central aspects of trigeminal nociceptive systems 313

F. Cervero
   Visceral nociception: peripheral and central aspects of visceral nociceptive systems 325

G. Guilhaud
   Thalamic nociceptive systems 339

S. A. Andersson and B. Rydenhag
   Cortical nociceptive systems 347

Discussion on the session on nociceptive systems: report by P. M. Headley 357

ENDOGENOUS ANTINOCICEPTION

H. L. Fields and Mary M. Heinricher
   Anatomy and physiology of a nociceptive modulatory system 361

A. W. Duggan
   Pharmacology of descending control systems 375

P. D. Wall
   Future trends in pain research 393

Discussion on the session on endogenous antinociception: report by R. G. Hill 403

Synopses from the poster exhibition organized by F. Cervero 407
