INDEXES TO VOLUME 310 (B)

Author index

Anderson, R. M. & Trewella, W. Population dynamics of the badger (Meles meles) and the epidemiology of bovine tuberculosis (Mycobacterium bovis), 327.

Andrews, Elizabeth B. Structure and function in the excretory system of archaeogastropods and their significance in the evolution of gastropods, 383.

Batson, B. S. A paradigm for the study of insect-ciliate relationships: Tetrahymena sialis sp. nov. (Hymenostomatidae: Tetrahymenidae), parasite of larval Sialis lutaria (Linn.) (Megaloptera: Sialidae), 123.

Biggs, P. M. Infectious animal disease and its control, 259.

Brown, F. The newer vaccines, 291.

Budemann, B. U. & Young, J. Z. Central pathways of the nerves of the arms and mantle of Octopus, 109.

Buringh, P. The land resource for agriculture, 151.

Day, P. R. Crop improvement: breeding and genetic engineering, 193.

Edwards, C. A. Production of seed proteins from animal waste by earthworms, 299.

Egan, B. See Fogg et al.

Egan, B. & Floodgate, G. D. Biological studies in the vicinity of a shallow-sea tidal mixing front. II. The distribution of bacteria, 435.

Fewell, A. See Edelman & Fewell.

Floodgate, G. D. See Egan & Floodgate.

Floodgate, G. D. See Kassab et al.

Harris, T. M. See Bose et al.

Hoy, S. See Fogg et al.

Jones, D. A. See Fogg et al.

Jones, D. A. See Scrope-Howe & Jones.

Jopling, M. Opening address, 147.

Kassab, J. Y. See Fogg et al.

Kassab, J. Y., Whitaker, G. J. & Floodgate, G. D. Biological studies in the vicinity of a shallow-sea tidal mixing front. VI. A general statistical study, 521.

Land, R. B. Knowledge for animal breeding, 243.

Lawrence, A. B. See Wilson & Lawrence.

Lochte, K. Biological studies in the vicinity of a shallow-sea tidal mixing front. III. Seasonal and spatial distribution of heterotrophic uptake of glucose, 445.

Lochte, K. See Fogg et al.

Pal, P. K. See Bose et al.
Penning de Vries, F. W. T. See de Wit & Penning de Vries.
Pickett, J. A. Production of behaviour-controlling chemicals by crop plant, 235.
Polge, E. J. C. Genetic manipulation of animals [Abstract only], 297.

Reece, G. H. The role of the chemical industry in improving the effectiveness of agriculture, 201.
Rees, E. I. S. See Fogg et al.

Scrope-Howe, S. See Fogg et al.
Stanhill, G. The water resource for agriculture, 161.

Tinker, P. B. Crop nutrients: control and efficiency of use, 175.
Trewella, W. See Anderson & Trewella.
Turley, C. M. Biological studies in the vicinity of a shallow-sea tidal mixing front. IV. Seasonal and spatial distribution of urea and its uptake by phytoplankton, 471.
Turley, G. M. See Fogg et al.

Uchmanskii, J. Differentiation and frequency distributions of body weights in plants and animals, 1.

Whitaker, C. J. See Kassab et al.

Young, J. Z. See Budelmann & Young.
Agriculture and food: technology in the 1990s, Discussion; for detailed contents, see pp. 145 and 146. Archaeogastropod kidney ultrastructure and evolution, 383.

Bacteria distribution at fronts, 435.
Badger population dynamics, 327.
Bovine tuberculosis in badgers, 327.

Central pathways of nerves of _Octopus_, 109.

Discussion on technology in the 1990s: agriculture and food; for detailed contents, see pp. 145 and 146. Distributions of body weights, 1.

Ecosystems, frontal, 555.
Excretory system of archaeogastropods, 383.

Front, shallow-sea tidal mixing, 555.
Front, tidal mixing, physical and chemical background to biology, 407.
Fronts: bacteria discussion, 435.
Fronts, microbiology, heterotrophic activity, 445.
Fronts, urea uptake by phytoplankton, 471.

Insect–ciliate relationships, a new model system, 123.
Intraspecific competition, 1.

Microbial uptake of glucose at fronts, 445.
Microbiological activity at a tidal mixing front, 407.

_Octopus_, central pathways of nerves, 109.

Parametric and non-parametric methods for analysing marine biology data, 521.
Pentoxylon plant, 77.
Pretectal olivary nucleus: experimental anatomical studies in the rat, 573.

Statistical study of frontal ecosystems, 521.
Synaptic and cellular organization of the olivary pretectal nucleus, 573.

_Tetrahymena stalioides_ sp.nov., ciliate parasite of larval _Sialis lutaria_, 123.

Urea uptake by phytoplankton at fronts, 471.
Western Irish Sea front, 501.
Zooplankton distribution, 501.

_End of the three-hundred and tenth volume – Series B_
