Subject index

Brunhes record of vegetation, fire, lake levels and climate at Lake George, Australia, 379.

Copepod anatomy, 303.

Discussion on extraordinary fossil biotas: their ecological and evolutionary significance; for detailed contents see pp. 1 and 2.

Discussion on inorganic and organic radicals: their biological and clinical relevance; for detailed contents see pp. 449 and 450.

Fossil biotas: their ecological and evolutionary significance, Discussion; for detailed contents see pp. 1 and 2.

Functional morphology of copepods, 303.

Graded-index lenses in beetle eyes, 237.

Ipswichian deposits at Tattershall, Lincolnshire, 193.

Late Cainozoic vegetation, palaeotemperatures and palaeoprecipitation at Lake George, Australia, 379.

Muscles and mechanics of wing movements, 271.

Pleistocene interglacial deposits at Tattershall, Lincolnshire, 193.

Radicals, inorganic and organic: their biological and clinical relevance, Discussion; for detailed contents see pp. 449 and 450.

Scarab beetles, superposition eyes of, 237.

Wing movements in Diptera, 271.

End of the three hundred and eleventh volume – Series B
CONTENTS

Series B  Volume 311

No. 1148  17 October 1985
Extraordinary fossil biotas: their ecological and evolutionary significance
   A Discussion organized and edited by H. B. Whittington, F.R.S., and
   S. Conway Morris  . . . . . . . . . . . . . . . . . . . . . . . . . . . . page 1

No. 1149  19 November 1985
Late Pleistocene interglacial deposits at Tattershall, Lincolnshire
   By D. T. Holyoak and R. C. Precece. [Plate 1; pullouts 1–5]  . . . . . 193
Graded-index optics are matched to optical geometry in the superposition eyes of scarab beetles
   By P. McIntyre and S. Caveney. [Plates 1–4]  . . . . . . . . . . . . 237

No. 1150  19 November 1985
How Diptera move their wings: a re-examination of the wing base articulation and muscle systems concerned with flight
   By J. A. Miyian and A. W. Ewing. [Plates 1–3]  . . . . . . . . . . . 271
The comparative anatomy of two copepods, a predatory calanoid and a particle-feeding mormonilloid
   By G. A. Boxshall. [Plates 1–3]  . . . . . . . . . . . . . . . . . . 303

No. 1151  3 December 1985
Late Cainozoic history of vegetation, fire, lake levels and climate, at Lake George, New South Wales, Australia
   By G. Singh and Elizabeth A. Geissler. [Pullouts 1–5]  . . . . . . . 379

No. 1152  17 December 1985
Inorganic and organic radicals: their biological and clinical relevance
   A Discussion organized and edited by R. O. C. Norman, F.R.S., and H. A. O. Hill
   and edited by H. A. O. Hill  . . . . . . . . . . . . . . . . . . . . . . . 449
Protozoal diseases continue to exact a tragic toll of human life in many tropical and subtropical countries. The potential importance of immunoprophylactic measures in parasite infections is immense, though this goal has remained elusive.

This volume records papers presented at a Royal Society Discussion Meeting held in February 1984 concerned with the application of recent technical advances to the study of human protozoal diseases and the development of practical and effective vaccines.
Notes and Records

This journal was first published in 1938 as a house journal for Fellows of The Royal Society. It has since developed into one of the foremost journals of the history of science, containing articles by distinguished contributors from the United Kingdom, the U.S.A. and many other countries. The high standard of presentation, with plates and diagrams where these would be of value to the reader, and quality of the articles leave it unsurpassed in the field of history of science journals.

One volume is published annually in two parts and may be obtained through any bookseller or direct from The Royal Society at £15.75 (U.K. addresses) £16.50 (overseas). Separate parts are available at £9.50 (U.K. addresses) and £10.00 (overseas).

A cumulative author and title index to volumes 1 to 20 (1938–1965), containing approximately 1500 entries, is available at £3.00 (U.K. addresses) and £3.20 (overseas).

The contents of the latest issue (Vol. 39 No. 2, 1985, ISSN 0035–9149) are:
