A century of nitrogen fixation research: present status and future prospects

A Discussion organized and edited by
F. J. Bergersen, F.R.S., and J. R. Postgate, F.R.S.
Notice to contributors

The Royal Society welcomes suitable communications for publication in its scientific journals: papers estimated to occupy up to 24 printed pages are considered for the Proceedings and longer papers and those with numerous or large illustrations for the Philosophical Transactions.

Detailed advice on the preparation of papers to be submitted to the Society is given in a leaflet available from the Executive Secretary, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG. The 'Instructions to authors' are also printed in every fifth volume of the Proceedings A and B (volume numbers ending in 0 or 5). The basic requirements are: a paper should be as concise as its scientific content allows and grammatically correct; standard nomenclature, units and symbols should be used; the text (including the abstract, the list of references and figure descriptions) should be in double spaced typing on one side of the paper. A leaflet giving detailed advice on the preparation of illustrations is available from the Executive Secretary; diagrams should be expertly drawn at about twice the proposed final size, preferably with lettering in the correct style but if this is not possible the lettering should be inserted not on the original drawings but on a set of copies; where photographs are essential the layout should be designed to give the most effective presentation.

The initial submission of a paper must be through a Fellow or Foreign Member of the Society, but subsequent correspondence will be conducted direct with the author. The latest lists of Fellows and Foreign Members are to be found in the current edition of the Year Book of the Royal Society. A copy of 'Notes for the guidance of Fellows communicating papers' is available from the Executive Secretary. In the event of any difficulty, an author is invited to seek the assistance of the Executive Secretary.

No page charge is levied, and the first 50 offprints of a paper are supplied to the author gratis.

The Editors particularly welcome short communications to Proceedings; as far as possible they will be given expeditious treatment both in consideration and in printing, and this will be facilitated if a paper is submitted with a firm recommendation by a Fellow.

Associate Editors: series B, Biological Sciences

A CENTURY OF NITROGEN FIXATION RESEARCH: PRESENT STATUS AND FUTURE PROSPECTS

A Discussion organized and edited by F. J. Bergeresen, F.R.S., and J. R. Postgate, F.R.S.

(Discussion held 22 and 23 October 1986 – Typescripts received 5 February 1987)

[Three plates]

CONTENTS

J. R. Postgate, F.R.S.
Preface

P. S. Nutman, F.R.S.
Centenary lecture on nitrogen fixation

G. Kratzsch
Hellriegel’s work at Bernburg

Janet I. Sprent, J. M. Sutherland and S. M. de Faria
Some aspects of the biology of nitrogen-fixing organisms

B. E. Smith, F. Campbell, R. R. Eady, M. Eldridge, C. M. Ford,
Susan Hill, E. P. Kavanagh, D. J. Lowe, R. W. Miller,
T. H. Richardson, R. L. Robson, R. N. F. Thorneley and M. G. Yates
Biochemistry of nitrogenase and the physiology of related metabolism
Discussion: A. W. B. Johnston, J. Chatt, F.R.S., J. H. Becking

R. A. Dixon, S. Austin, M. Buck, M. Drummond, S. Hill, A. Holtel,
S. MacFarlane, M. Merrick and S. Minchin
Genetics and regulation of nif and related genes in Klebsiella pneumoniae
Discussion: F. C. Cannon, R. Haselkorn

Christina Kennedy, M. Buck, D. Evans, R. Humphrey, R. Jones,
J. Ramos, R. Robson, E. Santero, K. Tibelius, A. Toukdarian,
P. Woodley and G. Yates
The genetic analysis of nitrogen fixation, oxygen tolerance and hydrogen uptake in azotobacters
Discussion: F. C. Cannon

Vol. 317. B 1184 10 [Published 24 September 1987]
CONTENTS

R. Haselkorn, J. W. Golden, P. J. Lammers and M. E. Mulligan
Rearrangement of nif genes during cyanobacterial heterocyst differentiation 173

Claudine Elmerich, H. Bozouklian, Claire Vieille, C. Fogher, B. Perroud, A. Perrin and J. Vanderleyden
Azospirillum: genetics of nitrogen fixation and interaction with plants
Discussion: J. W. Drozd, J. Döbereiner 183

Molecular analysis of the Rhizobium genes involved in the induction of nitrogen-fixing nodules on legumes
Discussion: J. M. Vincent, R. Haselkorn, D. G. Jones, F. R. Minchin, J. Döbereiner, Janet I. Sprent 191

H. J. Evans, M. Zuber and D. A. Dalton
Some processes related to nitrogen fixation in nodulated legumes
Discussion: H. Bothe, J. Döbereiner, M. G. Yates, F. R. Minchin, Janet I. Sprent 193

J. R. Postgate, F.R.S., R. Dixon, Susan Hill and Helen Kent
nif genes in alien backgrounds 206

W. D. P. Stewart, F.R.S., P. Rowell, N. W. Kerby, R. H. Reed and G. C. Machracy
N₂-fixing cyanobacteria and their potential applications
Discussion: F. C. Cannon, J. Becking 225

W. E. Newton
New, man-made N₂-fixing systems
Discussion: G. D. Watt, J. Chatt, F.R.S. 227

M. J. Dilworth
Where to now?
Discussion: J. M. Lynch, J. W. Drozd 245

General discussion 247

F. J. Bergersen, F.R.S.
Concluding remarks 259
