NOTICE TO AUTHORS

Scope. Philosophical Transactions series B welcomes papers on any aspect of biological science. Authors may send their papers direct to the Society's Editorial Office, whose address is given below; it is no longer a requirement that papers be submitted through a Fellow or Foreign Member of the Society, although authors may do so if they wish. In general, papers for Philosophical Transactions B should normally be no longer than 25000 words (including allowances for references and figures). Longer papers will be considered exceptionally, and authors of such papers should consult the Editor before submission, preferably at an early stage in preparation.

Submission. Three copies of the typescript and figures are required, and originals of any figures should also be submitted. Papers should be prepared in accordance with the "Instructions to authors" printed at the end of every volume of Philosophical Transactions B after volume 324 and available from the Editorial Office. Although editorial processing of papers on disc is requested in (i) informing the Editorial Office of change of address, (ii) responding promptly to referees' comments, and (iii) returning proofs as quickly as possible. The journal is published monthly in a two-column format allowing flexibility of presentation; as the paper used is suitable for the printing of both text and half tone illustrations, the grouping of figures into plates is not necessary, although in some cases the use of plates may be desirable.

Publication. We aim to publish papers within five to seven months of receipt; to this end the cooperation of authors is requested in (i) informing the Editorial Office of change of address, (ii) responding promptly to referees' comments, and (iii) returning proofs as quickly as possible. The journal is published monthly in a two-column format allowing flexibility of presentation; as the paper used is suitable for the printing of both text and half tone illustrations, the grouping of figures into plates is not necessary, although in some cases the use of plates may be desirable.

Editorial address: Editorial Office, Philosophical Transactions B, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG.

COPYRIGHT

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, this publication may only be reproduced, stored or transmitted, in any form or by any means, with the prior permission in writing of the publisher, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. In particular, the Society permits the making of a single photocopy of an article from this issue (under Sections 29 and 38 of the Act) for an individual for the purposes of research or private study.

SUBSCRIPTIONS

Philosophical Transactions of the Royal Society series B (ISSN 0009-4622) is published monthly in four volumes each year. The subscription price for 1992, including postage, is £300 in the U.K. and £383 (U.S.$ 1013) overseas. Air-speeded post is available for overseas subscribers at a small extra charge. Full details of subscription rates may be obtained on request from the Publications Sales and Marketing Manager, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG.

## CONTENTS

**Geoffrey Eglinton and Graham A. Logan**  
Molecular preservation 315  
327

**Jan W. de Leeuw, Pim F. van Bergen, Ben G. K. van Aarssen, Jean-Pierre L. A. Gatellier, Jaap S. Sinninghe Damsté and Margaret E. Collinson**  
Resistant biomacromolecules as major contributors to kerogen 329  
336

**C. B. Eckardt, B. J. Keely, J. R. Waring, M. I. Chicarelli, J. D. Hudson**  
Preservation of chlorophyll-derived pigments in sedimentary organic matter 339  
*Discussion*: J. L. Bada, M. H. Engel  
347

**Stephen A. Macko and Michael H. Engel**  
Assessment of indigeneity in fossil organic matter: amino acids and stable isotopes 367  
*Discussion*: J. L. Bada, B. Halstead  
374

**Jerald M. Lowenstein and Gary Scheuenstuhl**  
Immunological methods in molecular palaeontology 375  
*Discussion*: G. Eglinton, P. Westbroek, G. Muyzer  
380

**R. P. Ambler and M. Daniel**  
Proteins and molecular palaeontology 381  
*Discussion*: G. A. Dover, B. Halstead, J. P. Thorpe  
389

**Bruce Runnegar**  
Nucleic acid and protein clocks 391  
*Discussion*: T. A. Brown, G. A. Dover  
397

**Erika Hagelberg, Lynne S. Bell, Tim Allen, Alan Boyde, Sheila J. Jones and J. B. Clegg**  
Analysis of ancient bone DNA: techniques and applications 399  
*Discussion*: S. Hummel, T. A. Brown, R. P. Ambler  
407

**Satoshi Horai, Rumi Kondo, Kumiko Murayama, Seiji Hayashi, Hiroko Koike and Nobuyuki Nakai**  
Phylogenetic affiliation of ancient and contemporary humans inferred from mitochondrial DNA 409  
*Discussion*: K. A. Joysey, G. A. Dover, S. Pääbo  
416

**Edward M. Golenberg**  
Amplification and analysis of Miocene plant fossil DNA 419  
*Discussion*: T. A. Brown, J. L. Bada, P. Westbroek, M. J. Bishop, G. A. Dover  
426

**Arend Sidow, Allan C. Wilson and Svante Pääbo**  
Bacterial DNA in Clarkia fossils 429  
*Discussion*: S. Hummel, J. L. Bada, P. Westbroek, E. Hagelberg, G. B. Curry
