Chromosome segregation
Papers of a Discussion Meeting Issue organized and edited by K. Nasmyth and M. Yanagida

Introduction: dissection and simplification of chromosome segregation
M. Yanagida & K. Nasmyth

How might cohesin hold sister chromatids together?
K. Nasmyth

Diversity and redundancy in bacterial chromosome segregation mechanisms
J. Errington, H. Murray & L. J. Wu

SMC proteins and chromosome mechanics: from bacteria to humans
T. Hirano

Shugoshin protects cohesin complexes at centromeres
Y. Watanabe & T. S. Kitajima

Towards understanding the molecular basis of bacterial DNA segregation
T. A. Leonard, J. Møller-Jensen & J. Löve

Rings, bracelet or snaps: fashionable alternatives for SMC complexes
C. E. Huang, M. Milutinovich & D. Koshland

Roles and regulation of the Drosophila centromere cohesion protein MEI-332 family
J. Y. Lee, A. Hayashi-Hagihara & T. L. Orr-Weaver

Merotelic kinetochores in mammalian tissue cells
E. D. Salmon, D. Cimini, L. A. Cameron & J. G. DeLuca

The role of heterochromatin in centromere function
A. L. Pidoux & R. C. Allshire

Chromosome bi-orientation on the mitotic spindle
T. U. Tanaka

A comparison of the ability of XMAP215 and tau to inhibit the microtubule destabilizing activity of XKCM1
T. L. Noetzel, D. N. Drechsel, A. A. Hyman & K. Kinoshita

Two distinct pathways responsible for the loading of CENP-A to centromeres in the fission yeast cell cycle
K. Takahashi, Y. Takayama, F. Masuda, Y. Kobayashi & S. Saitoh

Basic mechanism of eukaryotic chromosome segregation
M. Yanagida

Mechanism and function of poleward flux in Xenopus extract meiotic spindles
T. J. Mitchison

Chromosomal instability and human cancer
F. Michor

Explaining the oligomerization properties of the spindle assembly checkpoint protein Mad2
A. DeAntoni, V. Sala & A. Musacchio

The world's longest running international science journal
