Editorial Board

J. Ahringer, Wellcome Trust/Cancer Research UK
Gordon Institute, University of Cambridge

D. I. Attwood, Department of Physiology, University College London

Z. Chen, Vice President, Chinese Academy of Sciences

R. L. Gardner, Department of Zoology, University of Oxford

P. N. Goodfellow, GlaxoSmithKline, Stevenage

J. C. Gray, Department of Plant Sciences, University of Cambridge

K. Gull, Sir William Dunn School of Pathology, University of Oxford

A. Iriki, Maxillofacial Biology, Tokyo Medical and Dental University

A. Kornberg, Department of Biochemistry, Stanford University School of Medicine

T. Lamb, John Curtin School of Medical Research, Australian National University

D. MacLennan, Baniting and Best Department of Medical Research, University of Toronto

M. A. Nowak, Centre for Mathematical Biology, Harvard University

A. J. Pawson, Samuel Lunenfeld Research Institute, Mount Sinai Hospital, Toronto

H. Sakata, Physiology, Nihon University

O. Siddiqi, National Centre for Biological Sciences, Bangalore

M. S. Swaminathan, UNESCO Cousteau Chair in Ecnotechnology, MS Swaminathan Research Foundation

M. Tessier-Lavigne, Brain Development, Howard Hughes Medical Institute

Sir Crispin Tickell, Chancellor, University of Kent at Canterbury

Sir David Weatherall, Institute of Molecular Medicine, University of Oxford, John Radcliffe Hospital

R. Wehner, Institute of Zoology, University of Zürich

R. Williamson, Faculty of Medicine, University of Melbourne

Scope: Philosophical Transactions of The Royal Society B: Biological Sciences publishes papers presented at Discussion Meetings as well as specific themes and reviews concerning all aspects of biological science. Proposals for Theme Issues and Reviews are welcomed for consideration by the Editor. These should be sent to our Editorial Office at the address given below. The journal is complementary to Proceedings of The Royal Society B: Biological Sciences, which considers unsolicited papers in the same subject. All contributions are peer reviewed to a high standard.

Publication: We aim to publish papers within 5–7 months of receipt. The journal is published monthly in a two-column format.

Submission: Authors of Reviews, and contributors to Discussion Meetings and Theme Issues should prepare their papers in accordance with the current Resources for Authors available at www.pubs.royalsoc.ac.uk or from the Editorial Office. Corresponding authors will receive 50 free offprints and a complimentary copy of the journal issue.

Copyright © 2005 The Royal Society

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, this publication may only be reproduced, stored or transmitted, in any form or by any other means, with the prior permission in writing of the publisher, or in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. In particular, the Society permits the making of a single photocopy of an article from this issue (under Sections 29 and 38 of this Act) for an individual for the purposes of research or private study.

Subscriptions: Philosophical Transactions of The Royal Society B: Biological Sciences (ISSN 0962-8436) is published in monthly parts. The annual subscription price in 2005, including postage, is given below. An-speeded post is included for overseas subscribers. Full details of all subscriptions (now including electronic access at no extra charge) can be obtained on request from the Publications Sales Office, address as below.

The June issue will be a Prize Lectures and Reviews Issue, which will include, among others, the following papers:

The Bernal Lecture 2004. Are low-frequency electromagnetic fields a health hazard?
M. J. Crumpton

The Croonian Lecture 2001. Hunting the antiscical cancer cell: MCM proteins and their exploitation
R. Laskey

J. R. Krebs

The Ferrier Lecture 1995. Behind the Seen: the functional specialization of the brain in space and time
S. Zeki

The Ferrier Lecture 2004. What can transcranial magnetic stimulation tell us about how the brain works?
A. Cowey

The Leeuwenhoek Lecture 2000. The natural and unnatural history of methane-oxidizing bacteria
H. Dalton

The Medawar Lecture 1998. Is science dangerous?
L. Wolfert

The Medawar Lecture 2001. Knowledge for vision: vision for knowledge
R. L. Gregory

The Medawar Lecture 2004. The truth about science
P. Lipton

What is the function of the clastrum?
F. Crick & C. Koch

The Royal Society is an independent academy promoting the natural and applied sciences. Founded in 1660, the Society has three roles, as the UK academy of science, as a learned Society, and as a funding agency. It responds to individual demand with selection by merit, not by field. The Society’s objectives are to:

• strengthen UK science by providing support to excellent individuals

• fund excellent research to push back the frontiers of knowledge

• attract and retain the best scientists

• ensure the UK engages with the best science around the world

• support science communication and education; and communicate and encourage dialogue with the public

• provide the best independent advice nationally and internationally

• promote scholarship and encourage research into the history of science

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialling +44 (0)20 7839 5561, or visit the Society’s Web site (www.royalsoc.ac.uk).

Research Support (UK grants and fellowships)
Research appointments: 2547
Research grants: 2539
Conference grants: 2540

Science Advice
General enquiries: 2585

Science Communication
General enquiries: 2572

International Exchanges (for grants enabling research visits between the UK and most other countries (except the USA))
General enquiries: 2550

Library and Information Services
Library/archive enquiries: 2606

Inset picture: This issue explores the combined use of different neuroimaging modalities to identify the changing web of neural connections involved in brain function. The cover inset shows the skin surface reconstructed from a T1 MRI image volume, co-registered EEG electrode placement (see paper by Riera et al., pp. 1025-1041) for concurrent EEG/fMRI recordings. This is superimposed on brain maps of BOLD activation to faces with emotional content (see paper by Valdes et al., pp. 969-981). (Image design: David Fernández-Fonseca.)
