Immunoregulation: harnessing T cell biology for therapeutic benefit

Papers of a Theme Issue compiled and edited by S. M. Metcalfe, R. Y. Calne and S. P. Cobbold

Introduction: immunoregulation: harnessing T cell biology for therapeutic benefit 1641
S. M. Metcalfe, R. Y. Calne & S. P. Cobbold

Foxp3 and dominant tolerance 1645
A. Rudensky

CD4+ regulatory cells as a potential immunotherapy 1647
Z. Fehérvari & S. Sakaguchi

Lipid rafts and regulation of the cytoskeleton during T cell activation 1663
K. F. Meiri

Semaphorins: a new class of immunoregulatory molecules 1673
N. Takegahara, A. Kumanogoh & H. Kikutani

Regulation of T cell dependent immune responses by TIM family members 1681
C. Mariat, A. Sánchez-Fueyo, S. P. Alexopoulos, J. Kenny, T. B. Strom & X. X. Zheng

Axotrophin and leukaemia inhibitory factor (LIF) in transplantation tolerance 1687
S. M. Metcalfe

T cell tolerance induced by therapeutic antibodies 1695
S. P. Cobbold

CAMPATH: from concept to clinic 1707
H. Waldmann & G. Hale

Homeostatic T cell proliferation as a barrier to T cell tolerance 1713
S. P. Hickman & L. A. Turka

Induction of transplantation tolerance in non-human primate preclinical models 1723
D. A. Hale, K. Dhanireddy, D. Bruno & A. D. Kirk

Development of tolerogenic strategies in the clinic 1739
S. J. Knechtle

Bone marrow transplantation and approaches to avoid graft-versus-host disease (GVHD) 1747
B. R. Blazar & W. J. Murphy

Cell transplantation for diabetes 1769
R. Calne

Grafting for demyelinating disease 1775
V. Tepavčević & W. F. Blakemore

Clinical transplantation: current problems, possible solutions 1797
R. Calne
