Reactive oxygen species in health and disease

Papers of a Theme Issue compiled and edited by O. H. Petersen, A. Spät and A. Verkhratsky

Introduction: reactive oxygen species in health and disease
O. H. Petersen, A. Spät & A. Verkhratsky

The oxygen sensing signal cascade under the influence of reactive oxygen species
H. Acker

Glucose-sensing mechanisms in pancreatic β-cells
P. E. MacDonald, J. W. Joseph & P. Ronson

Glucose-sensing neurons of the hypothalamus
D. Burdakov, S. M. Luckman & A. Verkhratsky

Cross talk between Ca\textsuperscript{2+} and redox signalling cascades in muscle and neurons through the combined activation of ryanodine receptors/Ca\textsuperscript{2+} release channels
C. Hidalgo

A central role for ROS in the functional remodelling of L-type Ca\textsuperscript{2+} channels by hypoxia

Ca\textsuperscript{2+} signals and death programmes in neurons
L. Berliocchi, D. Bano & P. Nicotera

Antioxidant effects and the therapeutic mode of action of calcium channel blockers in hypertension and atherosclerosis
T. Godfraind

Free radicals and the pancreatic acinar cells: role in physiology and pathology
M. Chvanov, O. H. Petersen & A. Tepikin

Reactive oxygen species and redox-regulation of skeletal muscle adaptations to exercise
M. J. Jackson

Consequences of the electrogenic function of the phagocytic NADPH oxidase
B. K. Rada, M. Geiszt, C. Hably & E. Ligeti

Dual oxidases
A. Dorko, Z. Piterfi, A. Sum, T. Leo & M. Geiszt

The role of an astrocytic NADPH oxidase in the neurotoxicity of amyloid beta peptides
A. Y. Abramov & M. R. Duchen

Electron and proton transport by NADPH oxidases
N. Demaures & G. J. Petneh

NADPH oxidase-derived reactive oxygen species in cardiac pathophysiology

Alpha-ketoglutarate dehydrogenase: a target and generator of oxidative stress
L. Trettier & V. Adam-Vizi

Normal brain ageing: models and mechanisms
E. C. Toescu

Oxidative stress and ageing: is ageing a cysteine deficiency syndrome?
W. Droge
