GUIDANCE FOR AUTHORS

Selection criteria
The criteria for selection are scientific excellence, originality and interest across disciplines within biology. The Editors are responsible for all editorial decisions and they make these decisions based on the reports received from the referees and/or Editorial Board members. Many more good proposals and articles are submitted to us than we have space to print, we give preference to those that are of broad interest and of high scientific quality.

Publishing format
Phil. Trans. R. Soc. B articles are published regularly online and in print issues twice a month. Along with all Royal Society journals, we are committed to archiving and providing perpetual access. The journal also offers the facility for including Electronic Supplementary Material (ESM) to papers. Contents of the ESM might include detailed methods, derivations of equations, large tables of data, DNA sequences and computer programs. However, the printed version must include enough detail to satisfy most non-specialist readers. Supplementary data up to 10Mb is placed on the Society’s website free of charge. Larger datasets must be deposited in recognised public domain databases by the author.

Conditions of publication
Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the mass media. Like many journals, Phil. Trans. R. Soc. B follows an embargo policy where the reporting of a scientific article by the media is embargoed until a specific time. The Executive Editor has final authority in all matters relating to publication.

Electronic Submission details
For all submission guidelines and access to all journal content please visit the Phil. Trans. R. Soc. B website at publishing.royalsociety.org/philtransb.

The Royal Society is an independent scientific academy, founded in 1660 and self-governing under Royal Charter. The Society has three roles, as the scientific academy of the United Kingdom, as a learned society, and as a funding body.

The objectives of the Royal Society are to
• recognise excellence in science
• support leading-edge scientific research and its applications
• stimulate international interaction
• further the role of science, engineering and technology in society
• promote the public’s understanding of science
• provide independent authoritative advice on matters relating to science, engineering and technology
• encourage research into the history of science

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialling: +44 (0)20 7839 5561, or visit the Society’s Web site (www.royalsociety.org).

Research Support (UK, grants and fellowships)
Research appointments: 2547 Research grants: 2539 Conference grants: 2540

Science Advice
General enquiries: 2583
Science Communication
General enquiries: 2572

International Exchanges (for grants enabling research visits between the UK and most other countries (except the US))
General enquiries: 2555
