The boreal forest and global change

Papers of a Theme Issue compiled and edited by K. E. Ruckstuhl, E. A. Johnson and K. Miyanishi

Introduction. The boreal forest and global change
K. E. Ruckstuhl, E. A. Johnson & K. Miyanishi

Streamflow hydrology in the boreal region under the influences of climate and human interference
M.-k. Woo, R. Thorne, K. Szeto & D. Yang

Could increased boreal forest ecosystem productivity offset carbon losses from increased disturbances?
W. A. Kurz, G. Stinson & G. Rampley

Trends in recent temperature and radial tree growth spanning 2000 years across northwest Eurasia
K. R. Briffa, V. V. Shishov, T. M. Melvin, E. A. Vaganov, H. Grudt, R. M. Hantemirov, M. Eronen & M. M. Naurozbaev

Climate change and the northern Russian treeline zone
G. M. MacDonald, K. V. Kremenetski & D. W. Beilman

Spatially explicit fire-climate history of the boreal forest-tundra (Eastern Canada) over the last 2000 years
S. Payette, L. Filion & A. Delwaide

Climate and wildfires in the North American boreal forest
M. Macias Fauria & E. A. Johnson

The effect of climate anomalies and human ignition factor on wildfires in Russian boreal forests
F. Achard, H. D. Eva, D. Mollicone & R. Beuchle

Sensitivity of managed boreal forests in Finland to climate change, with implications for adaptive management

Potentials and limitations for human control over historic fire regimes in the boreal forest
A. Granström & M. Niklasson

Hierarchical path analysis of deer responses to direct and indirect effects of climate in northern forest
A. Mysterud, N. G. Yoccoz, R. Langvatn, N. Pettorelli & N. C. Stenseth

Climate change reduces reproductive success of an Arctic herbivore through trophic mismatch
E. Post & M. C. Forchhammer

The boreal forest and global change

Papers of a Theme Issue compiled and edited by K. E. Ruckstuhl, E. A. Johnson and K. Miyanishi

12 July 2008
volume 363 • number 1501 • pages 2243–2375
