Ecological immunology

Papers of a Theme Issue compiled and edited by Hinrich Schulenburg, Joachim Kurtz, Yannick Moret and Mike T. Siva-Jothy

Introduction

Introduction. Ecological Immunology

H. Schulenburg, J. Kurtz, Y. Moret & M. T. Siva-Jothy

Articles

Immunity in a variable world

B. P. Lazzaro & T. J. Little

The role of ecological feedbacks in the evolution of host defence: what does theory tell us?

M. Boots, A. Best, M. R. Miller & A. White

Decomposing health: tolerance and resistance to parasites in animals

L. Råberg, A. L. Graham & A. F. Read

Maternal transfer of antibodies in vertebrates: trans-generational effects on offspring immunity

D. Hasselquist & J.-Å. Nilsson

On sexual dimorphism in immune function

C. L. Nunn, P. Lindenfors, E. R. Pursall & J. Roll

Inflammation and oxidative stress in vertebrate host–parasite systems

G. Sorci & B. Faire

Immune defence, parasite evasion strategies and their relevance for ‘macroscopic phenomena’ such as virulence

P. Schmid-Hempel

The evolution of RNAi as a defence against viruses and transposable elements

D. J. Obbard, K. H. J. Gordon, A. H. Buck & F. M. Jiggins

Does intra-individual major histocompatibility complex diversity keep a golden mean?

B. Woelfing, A. Traulsen, M. Milinski & T. Boehm

Analogies in the evolution of individual and social immunity

S. Cremer & M. Sixt
