Impacts of environmental change on reproduction and development in wildlife

Papers of a Theme issue compiled and edited by Stuart R. Milligan, William V. Holt and Rhiannon Lloyd

Introduction
Impacts of climate change and environmental factors on reproduction and development in wildlife
S. R. Milligan, W. V. Holt & R. Lloyd

Articles
The impacts of climate change on the annual cycles of birds
C. Carey
Climate change and seasonal reproduction in mammals
F. H. Bronson
Effects of heat stress on mammalian reproduction
F. L. Hansen
Nutritional effects on oocyte and embryo development in mammals: implications for reproductive efficiency and environmental sustainability
C. J. Ashworth, L. M. Toma & M. G. Hunter
The endocrine control of reproduction in Nereidae: a new multi-hormonal model with implications for their functional role in a changing environment
A. J. Lawrence & J. M. Soame
Genetic variation, inbreeding and chemical exposure—combined effects in wildlife and critical considerations for ecotoxicology
Anthropogenic pollutants: a threat to ecosystem sustainability?
S. M. Rhind
Epigenetic responses to environmental change and their evolutionary implications
B. M. Turner
Effect of the early-life nutritional environment on fecundity and fertility of mammals
D. S. Gardner, S. E. Ozanne & K. D. Sinclair
Effects of environmental change on wildlife health
K. Acevedo-Whitehouse & A. C. J. Duffus
