Genetics and the causes of evolution: 150 years of progress since Darwin

Papers of a Discussion Meeting issue organized and edited by Michael Bonsall and Brian Charlesworth

Introduction
Genetics and the causes of evolution: 150 years of progress since Darwin
M. Bonsall & B. Charlesworth

Articles
Evolution of quantitative traits in the wild: mind the ecology
J. M. Pemberton

Convergence in pigmentation at multiple levels: mutations, genes and function
M. Marceau, V. S. Domingues, C. R. Linnen, E. B. Rosenthal & H. E. Hoekstra

Divergence, demography and gene loss along the human lineage
H. L. Kim, T. Inaba, A. Kawashita, Y. Satta & N. Takahata

Adaptations to new environments in humans: the role of subtle allele frequency shifts
A. M. Hancock, G. Alkorta-Aranburu, D. B. Witonsky & A. Di Rienzo

Geographical variation in postzygotic isolation and its genetic basis within and between two Liriodendron species
N. H. Martin & J. H. Willi

Natural selection and the genetics of adaptation in threespine stickleback
D. Schluter, R. M. Marchinko, R. D. H. Barrett & S. M. Rogers

The evolution of HIV-1 and the origin of AIDS
J. M. Sharp & B. H. Hahn

Experimental evolution of viruses: Microviridae as a model system
A. W. Wichman & C. J. Brown

Unrestricted migration favours virulent pathogens in experimental metapopulations: evolutionary genetics of a successful pathogen
C. M. Eshelman, R. Vokal, J. L. Stewart, E. Halina, H. A. Lindberg, S. Schneider, M. Gualu, A. M. Dean & B. Kerr

Microbial secretor-cheater dynamics
S. A. Frank

Variation under domestication in plants: 1859 and today
A. H. D. Brown

Cattle demographic history modelled from autosomal sequence variation
C. Murray, E. Huerta-Sanchez, F. Casey & D. G. Bradley

Adaptations to sexual selection and sexual conflict: insights from experimental evolution and artificial selection
D. A. Edward, C. Frick & T. Chapman

Ecological genetics of sex ratios in plant populations

Genetic linkage and natural selection
N. H. Barton

Detecting positive selection within genomes: the problem of biased gene conversion
A. Ratnoukata, M. Mousset, S. Gilman, J. Berglund, N. Galtier, L. Defl & T. M. Webster

The genetic basis of evolutionary change in gene expression levels
J. J. Emerson & W.-H. Li
