Evolutionary and ecological approaches to the study of personality

Papers of a Theme issue compiled and edited by Denis Réale, Niels J. Dingemanse, Anahita J. N. Kazem and Jonathan Wright

Contents

Introduction
Evolutionary and ecological approaches to the study of personality
D. Réale, N. J. Dingemanse, A. J. N. Kazem and J. Wright

Articles
Recent models for adaptive personality differences: a review
N. J. Dingemanse and M. Wolf

An explanatory framework for adaptive personality differences
M. Wolf and F. J. Weissing

Evolutionary models of metabolism, behaviour and personality
A. I. Houston

Risk, resources and state-dependent adaptive behavioural syndromes
B. Luttbeg and A. Sih

Evolutionary genomics of animal personality
K. van Oers and J. C. Mueller

What can whole genome expression data tell us about the ecology and evolution of personality?
A. M. Bell and N. Aubin-Horth

Applying a quantitative genetics framework to behavioural syndrome research
N. A. Dochtermann and D. A. Roff

Coping styles and behavioural flexibility: towards underlying mechanisms
C. M. Coppens, S. F. de Boer and J. M. Koolhaas

Developmental perspectives on personality: implications for ecological and evolutionary studies of individual differences
J. A. Stamps and T. G. G. Groothuis

Personality: bridging the literatures from human psychology and behavioural ecology
D. Nettle and L. Penke

Personality and the emergence of the pace-of-life syndrome concept at the population level

Personality-dependent dispersal: characterization, ontogeny and consequences for spatially structured populations
J. Cote, J. Clobert, T. Brodin, S. Fogarty and A. Sih
Parasitism and the evolutionary ecology of animal personality
I. Barber and N. J. Dingemanse

The building-up of social relationships: behavioural types, social networks and cooperative breeding in a cichlid
R. Schürch, S. Rothenberger and D. Heg

Personality in the context of social networks
J. Krause, R. James and D. P. Croft
