Integration of muscle function for producing and controlling movement

Papers of a Theme issue compiled and edited by Timothy E. Higham and Andrew A. Biewener

Contents

Introduction
Mechanics, modulation and modelling: how muscles actuate and control movement
T. E. Higham, A. A. Biewener and S. L. Delp 1463

Articles
Skeletal muscle design to meet functional demands
R. L. Lieber and S. R. Ward 1466

Functional and architectural complexity within and between muscles: regional variation and intermuscular force transmission
T. E. Higham and A. A. Biewener 1477

The weak link: do muscle properties determine locomotor performance in frogs?
T. J. Roberts, E. M. Abbott and E. Azizi 1488

Muscle function in avian flight: achieving power and control
A. A. Biewener 1496

Red muscle function in stiff-bodied swimmers: there and almost back again
D. A. Syme and R. E. Shadwick 1507

Spring-like leg behaviour, musculoskeletal mechanics and control in maximum and submaximum height human hopping
M. F. Bobbert and L. J. Richard Casius 1516

Fibre operating lengths of human lower limb muscles during walking
E. M. Arnold and S. L. Delp 1530

The anatomical arrangement of muscle and tendon enhances limb versatility and locomotor performance
A. Wilson and G. Lichtwark 1540

Movement mechanics as a determinate of muscle structure, recruitment and coordination
J. M. Wakeling, O. M. Blake, I. Wong, M. Rana and S. S. M. Lee 1554

Neuromuscular strategies for the transitions between level and hill surfaces during walking
J. S. Gottschall and T. R. Nichols 1565

Leg muscles that mediate stability: mechanics and control of two distal extensor muscles during obstacle negotiation in the guinea fowl
M. A. Daley and A. A. Biewener 1580
A single muscle’s multifunctional control potential of body dynamics for postural control and running 1592

Shifts in a single muscle’s control potential of body dynamics are determined by mechanical feedback 1606
S. Sponberg, T. Libby, C. H. Mullens and R. J. Full

Speed adaptation in a powered transtibial prosthesis controlled with a neuromuscular model 1621
J. Markowitz, P. Krishnaswamy, M. F. Eilenberg, K. Endo, C. Barnhart and H. Herr
