# Disease avoidance: from animals to culture

*Papers of a Theme Issue compiled and edited by R. J. Stevenson, T. I. Case and M. J. Oaten*

## Contents

### Introduction

**Proactive strategies to avoid infectious disease**  
R. J. Stevenson, T. I. Case and M. J. Oaten  

### Articles

**Infection before pregnancy affects immunity and response to social challenge in the next generation**  

**Mate preferences and infectious disease: theoretical considerations and evidence in humans**  
J. M. Tybur and S. W. Gangestad  

**Brain–immune interactions and the neural basis of disease-avoidant ingestive behaviour**  
G. Pacheco-López and F. Bermúdez-Rattoni  

**Behavioural defences in animals against pathogens and parasites: parallels with the pillars of medicine in humans**  
B. L. Hart  

**The behavioural immune system and the psychology of human sociality**  
M. Schaller  

**Contamination sensitivity and the development of disease-avoidant behaviour**  
M. Siegal, R. Fadda and P. G. Overton  

**Disease avoidance as a functional basis for stigmatization**  
M. Oaten, R. J. Stevenson and T. I. Case  

**Disgust: the disease-avoidance emotion and its dysfunctions**  
G. C. L. Davey  

**Parasite stress promotes homicide and child maltreatment**  
R. Thornhill and C. L. Fincher  

**Why disgust matters**  
V. Curtis
