GUIDANCE FOR AUTHORS

The Royal Society, the national academy of science of the UK and the Commonwealth, is at the cutting edge of scientific progress. We support many top young scientists, engineers and technologists, influence science policy, debate scientific issues with the public and much more. We are an independent, charitable body and derive our authoritative status from our 1400 Fellows and Foreign Members.

Our mission: to expand knowledge and further the role of science and engineering in making the world a better place.

The Royal Society’s strategic priorities are to:

Invest in future scientific leaders and in innovation,

• Influence policymaking with the best scientific advice,

• Invigorate science and mathematics education,

• Invest in access to the best science internationally, and

• Inspire an interest in the joy, wonder and excitement of scientific discovery.

For full submission guidelines and access to all journal content please visit the Phil. Trans. R. Soc. B website at rscb.royalsocietypublishing.org.

Aims and scope

This issue of Phil. Trans. R. Soc. B is devoted to a specific area of the biological sciences. This area will define a research frontier that is advancing rapidly, often bridging traditional disciplines. Phil. Trans. R. Soc. B is essential reading for scientists working across the biological sciences. In particular, the journal is focused on the following key areas: neuroscience and cognitive; organismal and evolutionary biology; cell and developmental biology; and health and disease. As well as theme issues, the journal publishes papers from the Royal Society’s biological discussion meetings. For information on submitting a proposal for a theme issue, consult the journal’s

Selection criteria

The criteria for selection are scientific excellence, originality and interest across disciplines within biology. The Editor is responsible for all editorial decisions and she makes these decisions based on the reports received from the referees and/or Editorial Board members. Many more good proposals and articles are submitted to us than we have space to print, so we give preference to those that are of broad interest and of high scientific quality.

Publishing format

Phil. Trans. R. Soc. B articles are published regularly online and in print issues twice a month. Along with all Royal Society journals, we are committed to archiving and providing perpetual access. The journal also offers the facility for including Electronic Supplementary Material (ESM) to papers. Contents of the ESM might include details of methods, derivations of equations, large tables of data, DNA sequences and computer programs. However, the printed version must include enough detail to satisfy most non-specialist readers. Supplementary data up to 10Mb is placed on the Society’s website free of charge. Larger datasets must be deposited in recognised public domain databases by the author.

Conditions of publication

Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the mass media. Like many journals, Phil. Trans. R. Soc. B employs a strict embargo policy where the reporting of a scientific article by the media is embargoed until a specific time. The Editor has final authority in all matters relating to publication.

Electronic submission details

For full submission guidelines and access to all journal content please visit the Phil. Trans. R. Soc. B website at rscb.royalsocietypublishing.org.

SUBSCRIPTIONS

In 2012 Phil. Trans. R. Soc. B (ISSN 0962-8436) will be published twice a month.
