Aims and Scope
Each issue of Phil. Trans. R. Soc. B is devoted to a specific area of the biological sciences. This area will define a research frontier that is advancing rapidly, often bridging traditional disciplines. Phil. Trans. R. Soc. B is an essential resource for scientists working across the biological sciences. In particular, the journal is focused on the following four clusters of research: neuroscience and cognition; organismal and evolutionary biology; cell and developmental biology; and health and disease. As well as theme issues, the journal publishes papers from the Royal Society’s biological discussion meetings. As well as theme issues, the journal publishes papers from the Royal Society’s biological discussion meetings.

Submission of Manuscripts
Authors should follow the instructions for authors given at the end of the journal, and submit their manuscripts through the journal’s website, rstb.royalsocietypublishing.org. To have your paper considered for a theme issue, please indicate this in your submission, and contact the journal’s associate editor for that issue. Manuscripts should include a maximum of one figure and five references.

Guidance for Authors
Selection criteria
The criteria for selection are scientific excellence, originality and interest across disciplines within biology. The Editor is responsible for all editorial decisions and she makes these decisions based on the reports received from the referees and/or Editorial Board members. Many more good proposals and articles are submitted to us than we have space to print, so we give preference to those that are of broad interest and of high scientific quality.

Electronic Submission details
For full submission guidelines and access to all journal content please visit thePhil. Trans. R. Soc. B website at rstb.royalsocietypublishing.org.
