Sexual selection, social conflict and the female perspective

Papers of a Theme Issue compiled and edited by Dustin R. Rubenstein, Richard Prum and Michael Levandowsky

Contents

Introduction
Sexual and social competition: broadening perspectives by defining female roles
D. R. Rubenstein 2248

Articles
Aesthetic evolution by mate choice: Darwin’s really dangerous idea
R. O. Prum 2253

Sexual selection is a form of social selection
B. E. Lyon and R. Montgomerie 2266

The evolution of female ornaments and weaponry: social selection, sexual selection and ecological competition
J. A. Tobias, R. Montgomerie and B. E. Lyon 2274

The social selection alternative to sexual selection
J. Roughgarden 2294

Family feuds: social competition and sexual conflict in complex societies
D. R. Rubenstein 2304

The sociobiology of sex: inclusive fitness consequences of inter-sexual interactions
T. Pizzari and A. Gardner 2314

The limits of sexual conflict in the narrow sense: new insights from waterfowl biology
P. L. R. Brennan and R. O. Prum 2324

The evolution of optimal female mating rate changes the coevolutionary dynamics of female resistance and male persistence
E. Kazancioglu and S. H. Alonzo 2339

Looking for sexual selection in the female brain
M. E. Cummings 2348

Gene duplication, tissue-specific gene expression and sexual conflict in stalk-eyed flies (Diopsidae)
R. H. Baker, A. Narechania, P. M. Johns and G. S. Wilkinson 2357
