

Next-generation molecular and evolutionary epidemiology of infectious disease

Papers of a Discussion Meeting Issue compiled and edited by O. G. Pybus, C. Fraser and A. Rambaut

Contents

Introduction

- Evolutionary epidemiology: preparing for an age of genomic plenty** 20120193
O. G. Pybus, C. Fraser and A. Rambaut

Articles

- Molecular evolutionary signatures reveal the role of host ecological dynamics in viral disease emergence and spread** 20120194
S. M. Duke-Sylvester, R. Biek and L. A. Real
- Contrasting the epidemiological and evolutionary dynamics of influenza spatial transmission** 20120199
C. Viboud, M. I. Nelson, Y. Tan and E. C. Holmes
- Coalescent inference for infectious disease: meta-analysis of hepatitis C** 20120314
B. Dearlove and D. J. Wilson
- Uncovering epidemiological dynamics in heterogeneous host populations using phylogenetic methods** 20120198
T. Stadler and S. Bonhoeffer
- Modelling tree shape and structure in viral phylodynamics** 20120208
S. D. W. Frost and E. M. Volz
- The evolutionary dynamics of receptor binding avidity in influenza A: a mathematical model for a new antigenic drift hypothesis** 20120204
H.-Y. Yuan and K. Koelle
- Multiple scales of selection influence the evolutionary emergence of novel pathogens** 20120333
M. Park, C. Loverdo, S. J. Schreiber and J. O. Lloyd-Smith
- Graph hierarchies for phylogeography** 20120206
G. B. Cybis, J. S. Sinsheimer, P. Lemey and M. A. Suchard
- Cross-species comparison of site-specific evolutionary-rate variation in influenza haemagglutinin** 20120334
A. G. Meyer, E. T. Dawson and C. O. Wilke
- The evolutionary dynamics of influenza A virus adaptation to mammalian hosts** 20120382
S. Bhatt, T. T. Lam, S. J. Lycett, A. J. Leigh Brown, T. A. Bowden, E. C. Holmes, Y. Guan, J. L. N. Wood, I. H. Brown, P. Kellam, Combating Swine Influenza Consortium and O. G. Pybus
- The antigenic evolution of influenza: drift or thrift?** 20120200
P. S. Wikramaratna, M. Sandeman, M. Recker and S. Gupta
- Global mapping of infectious disease** 20120250
S. I. Hay, K. E. Battle, D. M. Pigott, D. L. Smith, C. L. Moyes, S. Bhatt, J. S. Brownstein, N. Collier, M. F. Myers, D. B. George and P. W. Gething

- Bacterial genomes in epidemiology—present and future** 20120202
N. J. Croucher, S. R. Harris, Y. H. Grad and W. P. Hanage
- Viral population analysis and minority-variant detection using short read next-generation sequencing** 20120205
S. J. Watson, M. R. A. Welkers, D. P. Depledge, E. Coulter, J. M. Breuer, M. D. de Jong and P. Kellam
- Observing micro-evolutionary processes of viral populations at multiple scales** 20120203
R. J. Orton, C. F. Wright, M. J. Morelli, N. Juleff, G. Thébaud, N. J. Knowles, B. Valdazo-González, D. J. Paton, D. P. King and D. T. Haydon
- Simultaneously reconstructing viral cross-species transmission history and identifying the underlying constraints** 20120196
N. R. Faria, M. A. Suchard, A. Rambaut, D. G. Streicker and P. Lemey
- Virulence attenuation during an influenza A/H5N1 pandemic** 20120207
M. F. Boni, T. D. Nguyen, M. D. de Jong and H. R. van Doorn
