Regulation from a distance: long-range regulation of gene expression

Papers of a Discussion Meeting Issue organised and edited by Veronica van Heyningen and Wendy Bickmore

Introduction
Regulation from a distance: long-range control of gene expression in development and disease 20120372
V. van Heyningen & W. Bickmore

Articles
Alterations to the remote control of Shh gene expression cause congenital abnormalities 20120357
R. E. Hill & L. A. Lettice

Chromatin organization and global regulation of Hox gene clusters 20120367
T. Montavon & D. Duboule

High-resolution analysis of cis-acting regulatory networks at the α-globin locus 20120361

Functional anatomy of distant-acting mammalian enhancers 20120359
D. E. Dickel, A. Visel & L. A. Pennacchio

From remote enhancers to gene regulation: charting the genome's regulatory landscapes 20120358
O. Symmons & F. Spitz

CTCF: the protein, the binding partners, the binding sites and their chromatin loops 20120369
S. J. B. Holwerda & W. de Laat

Deciphering cis-regulatory control in inflammatory cells 20120370
S. Ghisletti & G. Natoli

Effects of gene regulatory reprogramming on gene expression in human and mouse developing hearts 20120366
C.-H. Hsu & I. Ovcharenko

Human genetic variation within neural crest enhancers: molecular and phenotypic implications 20120360
A. Rada-Iglesias, S. L. Prescott & J. Wysocka

Deconvoluting complex tissues for expression quantitative trait locus-based analyses 20120363

Expression quantitative trait loci: present and future 20120362
A. C. Nica & E. T. Dermitzakis
