Space in the brain: cells, circuits, codes and cognition

Papers of a Theo Murphy Meeting Issue organized and edited by Tom Hartley, Colin Lever, Neil Burgess and John O'Keefe

Dedication

Dedication: Robert U. Muller (1942–2013) 20130618

J O'Keefe

Articles

Space in the brain: how the hippocampal formation supports spatial cognition

T Hartley, C Lever, N Burgess & J O'Keefe 20120510

Part I: Neuroanatomy of the hippocampal formation

Architecture of spatial circuits in the hippocampal region

MP Witter, CR Carlio, S Coury, N Koganezawa & RC O'Reilly 20120515

Part II: Spatial cells: head direction, place and boundary cells

Functional connectivity of the entorhinal–hippocampal space circuit

S-J Zhang, J Ye, JJ Couey, M Witter, EI Moser & M-B Moser 20120516

The development of spatial behaviour and the hippocampal neural representation of space

TJ Wills, L Muessig & F Cacucci 20130409

Part II: Spatial cells: grid, head direction, place and boundary cells

Functional correlates of the lateral and medial entorhinal cortex: objects, path integration and local–global reference frames

JJ Knierim, JP Neunuebel & SS Deshmukh 20130370

Independence of landmark and self-motion-guided navigation: a different role for grid cells

R Prước, F Sargolini, FY Song, B Mangy, S Foss & B Muller 20120512

Weighted cue integration in the rodent head direction system

R Knöpel, CF Pette, H Page, D Walter, E Marroni, M Nadtri, S Störger & KJ Jeffery 20130369

A theoretical account of cue averaging in the rodent head direction system

HT Page, D Walter, R Knöpel, C Pette, KJ Jeffery & SM Störger 20130370

Theta phase precession of grid and place cell firing in open environments

A Jenkins, C Barry, V Druckmann, D Masnari, C Lover & N Burgess 20120532

Boundary coding in the rat subiculum

A Stewart, A Jenkins, TJ Wills, N Burgess & C Lover 20130254

Part III: Modelling grid cells

Network mechanisms of grid cells

J Yeh, M BR Moser & Y Kaifu 20120511

How to build a grid cell

C Schmidt-Hieber & M Häusser 20130283

Neuronal rebound spiking, resonance frequency and theta cycle skipping may contribute to grid cell firing in medial entorhinal cortex

ME Hasselmo 20120523

Oscillatory neurocomputing with ring attractors: a network architecture for mapping locations in space onto patterns of neural synchrony

HT Blair, A Wu & J Cing 20120526

Optimal configurations of spatial scale for grid cell firing under noise and uncertainty

R Witter, C Barry, D Bush & N Burgess 20130290

Coordinated learning of grid cell and place cell spatial and temporal properties: multiple scales, attention and oscillations

SG Knierim, KJ Jeffery & S Mabe 20120524

How environment geometry affects grid cell symmetry and what we can learn from it

J Knöpel, M Rausch, S Burton, C Lover & J O'Keefe 20130283

An isomorphic mapping hypothesis of the grid representation

B Brecht, T Ray, A Burgardius, Q Tang, H Schenk & R Neumann 20131088

An isomorphic mapping hypothesis of the grid representation

B Brecht, T Ray, A Burgardius, Q Tang, H Schenk & R Neumann 20131088

The development of spatial behaviour and the hippocampal neural representation of space

TJ Wills, L Muessig & F Cacucci 20130409

Part IV: Oscillatory networks

Temporal redistribution of inhibition over neuronal subcellular domains underlies state-dependent rhythmic change of excitability in the hippocampus

P Sorribes, I Katona, T Kastner, B Liedtke & TJ Viny 20120518

Theta oscillations decrease spike synchrony in the hippocampus and entorhinal cortex

R Grossberg & PK Pilly 20120524

Theta oscillations decrease spike synchrony in the hippocampus and entorhinal cortex

R Grossberg & PK Pilly 20120524

Part V: Sharp wave/ripple replay and preplay

Sharp wave/ripple replay and preplay

R Knöpel, C Pette, H Page, D Walter, E Marroni, M Nadtri, S Störger & KJ Jeffery 20130304

Part VI: Human spatial cognition

Hippocampal theta oscillations are slower in humans than in rodents: implications for models of spatial navigation and memory

TJ Wills, L Muessig & F Cacucci 20130304

In this issue

Space in the brain: cells, circuits, codes and cognition
