Philosophical Transactions of the Royal Society B

Cover image: A patient’s malignant, pre-invasive ductal carcinoma in situ (DCIS) of the breast was stained against carbonic anhydrase IX. The 200× magnification image was colour-inverted for contrast and the carbonic anhydrase IX stain intensity and spatial variability can be visualized and quantified against the stromal regions (orange) of the breast and adipose tissue (blue). GUIDANCE FOR AUTHORS

Selection criteria

Theme issue topics are selected from proposals submitted to the journal. Each issue is guest edited by one or more experts in the field who invite all contributions (the journal does not accept unsolicited stand-alone papers). The criteria for selection of topics are scientific excellence, originality and interest across disciplines within biology. The Editor is responsible for all decisions on proposals and makes these decisions based on the reports received from the referees and/or Editorial Board members.

Publishing format

Phil. Trans. R. Soc. B articles are published regularly online and in print issues twice a month. Along with all Royal Society journals, we are committed to archiving and providing perpetual access. The journal also offers the facility for including Electronic Supplementary Material (ESM) to papers. Contents of the ESM might include details of methods, derivations of equations, large tables of data, DNA sequences and computer programs.

Conditions of publication

Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the mass media. Like many journals, Phil. Trans. R. Soc. B employs a strict embargo policy where the reporting of a scientific article by the media is embargoed until a specific time. The Editor has final authority in all matters relating to publication.

Electronic Submission details

For full submission guidelines and access to all journal content please visit the Phil. Trans. R. Soc. B website at rstb.royalsocietypublishing.org.

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialling on +44 (0) 1206 796351, or visit the Society’s Web site (royalsociety.org).

The Royal Society, the national academy of science of the UK and the Commonwealth, is at the cutting edge of scientific knowledge. We support many top young scientists, engineers and technologists, influence science policy, debate scientific issues with the public and much more. We are an independent, charitable body and derive our authoritative status from over 1400 Fellows and Foreign Members.

Our mission: to expand knowledge and further the role of science and engineering in making the world a better place.

The Royal Society’s strategic priorities are to:

- invest in future scientific leaders and in innovation,
- influence policymaking with the best scientific advice,
- invigorate science and mathematics education,
- increase access to the best science internationally, and
- inspire an interest in the joy, wonder and excitement of scientific discovery.

However, the printed version must include enough detail to satisfy most non-specialist readers. Supplementary data up to 10MB is placed on the Society’s website free of charge. Larger datasets must be deposited in recognised public domain databases by the author.

In 2014 Phil. Trans. R. Soc. B (ISSN 0962-8436) will be published fortnightly. Full details of subscriptions and single issue sales may be obtained either by contacting our journal fulfilment agent, Portland Customer Services, Commerce Way, Colchester CO2 8HP; tel: +44 (0)1206 796351; fax: +44 (0)1206 799331; email: sales@portland-services.com or by visiting our website at http://royalsocietypublishing.org/.
