Communicative rhythms in brain and behaviour

Papers of a Theme Issue compiled and edited by Rachel Smith, Tamara Rathcke, Fred Cummins, Katie Overy and Sophie Scott

Introduction

Communicative rhythms in brain and behaviour

R Smith, T Rathcke, F Cummins, K Overy & S Scott

Articles

Rhythm in joint action: psychological and neuropsychological mechanisms for real-time interpersonal coordination

P Keller, G Novembre & M Höfer

Fourteen-month-old infants use interpersonal synchrony as a cue to direct helpfulness

J-C Creede, J Vian & LJ Trainor

Take a breath and take the turn: how breathing meets turns in spontaneous dialogue

A Rachel-Capellan & S Fuchs

Exploring how musical rhythm entrains brain activity with electromyography frequency-tagging

S Norrington

Attentional entrainment and perceived event duration

JD McAuley & EK Fromboluti

Auditory rhythmic cues in movement rehabilitation: findings and possible mechanisms

S Schuetz

Cerebellum, temporal predictability and the updating of a mental model

SA Kato, A Stocker & M Schwartze

Losing the beat: deficits in temporal coordination

C Palmer, P Liédy & I Peretz

Quantification of rhythm problems in disordered speech: a re-evaluation

A Lowit

Speech rhythm: a metaphor?

F Nolan & HSJ iron

Timing in talking: what is it used for, and how is it controlled?

A Turk & S Shellaback-Huthnagel

Gestural coordination at prosodic boundaries and its role for prosodic structure and speech planning processes

K Kirkegaard

Situation influences on rhythmicity in speech, music, and their interaction

S Hawkins

Corrections

Correction to ‘Primordial germ cell specification: a context-dependent cellular differentiation event’

U Günesdogan, E Magnúsdóttir, MA Surani
