Theme issue: Movement suppression: brain mechanisms for stopping and stillness

	Article ID		Article ID
PREFACE		Mechanisms of saccade suppression revealed in the anti-saccade task	
Movement suppression: brain mechanisms for stopping and stillness		BC Coe and DP Munoz	20160192
R Carpenter and I Noorani	20160542	What stops a saccade?	
		LM Optican and E Pretegianni	20160194
ARTICLES		Abandoning and modifying one action plan for alternatives	
Not moving: the fundamental but neglected motor function		J-H Song	20160195
I Noorani and RHS Carpenter	20160190	Neural circuitry for behavioural arrest	
Towards a unifying mechanism for cancelling movements		T Roseberry and A Kreitzer	20160197
I Noorani	20160191	A Pause-then-Cancel model of stopping: evidence from basal ganglia neurophysiology	
Freeze for action: neurobiological mechanisms in animal and human freezing		R Schmidt and JD Berke	20160202
K Roelofs	20160206	Cortical control and performance monitoring of interrupting and redirecting movements	
Unchanging visions: the effects and limitations of ocular stillness		P Pouget, A Murthy and V Stuphorn	20160201
S Martinez-Conde and SL Macknik	20160204	Neuronal control of fixation and fixational eye movements	
Stopping smooth pursuit		RJ Krauzlis, L Goffart and ZM Hafed	20160205
M Missal and SJ Heinen	20160200	CORRECTIONS	
Inhibitory dysfunction contributes to some of the motor and non-motor symptoms of movement disorders and psychiatric disorders		Correction to 'Precision mapping of the vibrissa representation within murine primary somatosensory cortex'	
M Jahanshahi and JC Rothwell	20160198	PM Knutsen, C Mateo and D Kleinfeld	20170002
Models of inhibitory control		Correction to 'Origin of animal multicellularity: precursors, causes, consequences—the choanoflagellate/sponge transition, neurogenesis and the Cambrian explosion'	
JD Schall, TJ Palmeri and GD Logan	20160193	T Cavalier-Smith	20170001
Behavioural and computational varieties of response inhibition in eye movements			
V Cutsuridis	20160196		
Ocular stability and set-point adaptation			
DS Zee, P Jareonsettasin and RJ Leigh	20160199
