Contents

Theme issue: Animal coloration: production, perception, function and application

PREFACE
Animal coloration: production, perception, function and application
T Caro, MC Stoddard and D Stuart-Fox 20170047

INTRODUCTION
Animal coloration research: why it matters
T Caro, MC Stoddard and D Stuart-Fox 20160333

SECTION I: PRODUCTION
Interactions between colour-producing mechanisms and their effects on the integumentary colour palette
MD Shawkey and L D'Alba 20160536
Fluorescence as a means of colour signal enhancement
J Marshall and S Johnsen 20160335
Selection of the intrinsic polarization properties of animal optical materials creates enhanced structural reflectivity and camouflage
KD Feller, TM Jordan, D Wilby and NW Roberts 20160336
Genomics of coloration in natural animal populations
LM San-Jose and A Roulin 20160337

SECTION II: PERCEPTION
Coevolution of coloration and colour vision?
O Lind, MJ Henze, A Kelber and D Osorio 20160338
Colour, vision and coevolution in avian brood parasitism
MC Stoddard and ME Hauber 20160339

SECTION III: FUNCTION
The perfection of mimicry: an information approach
TN Sherratt and CA Peet-Paré 20160340

SECTION IV: EVOLUTION
Thermal consequences of colour and near-infrared reflectance
D Stuart-Fox, E Newton and S Clusella-Trullas 20160345
The colours of humanity: the evolution of pigmentation in the human lineage
NG Jablonski and G Chaplin 20160349

SECTION V: APPLICATION
Human colour in mate choice and competition
HM Rowland and RP Burriss 20160350
Cultural evolution of military camouflage
L Talas, RJ Baddeley and IC Cuthill 20160351

SYNTHESIS
The current and future state of animal coloration research
JA Endler and J Mappes 20160352
