Discussion meeting issue: Membrane pores: from structure and assembly, to medicine and technology

	Article ID		Article ID
INTRODUCTION		Haemolytic actinoporins interact with carbohydrates using their lipid-binding module	
Membrane pores: from structure and assembly, to medicine and technology		K Tanaka, JMM Caaveiro, K Morante and K Tsumoto	20160216
RJC Gilbert, H Bayley and G Anderluh	20160208		
ARTICLES		Apoptotic foci at mitochondria: in and around Bax pores	
Measuring the potential energy barrier to lipid bilayer electroporation		B Ugarte-Urbe and AJ García-Sáez	20160217
JT Sengel and MI Wallace	20160227	Pore formation by dimeric Bak and Bax: an unusual pore?	
Molecular mechanism of pore formation by aerolysin-like proteins		RT Uren, S Iyer and RM Kluck	20160218
M Podobnik, M Kisovec and G Anderluh	20160209	Single-molecule nanopore enzymology	
Listeriolysin O: from bazooka to Swiss army knife		K Willems, V Van Meervelt, C Wloka and G Maglia	20160230
SE Osborne and JH Brumell	20160222	Insertion of proteins and lipopolysaccharide into the bacterial outer membrane	
The mystery behind membrane insertion: a review of the complement membrane attack complex		I Botos, N Noinaj and SK Buchanan	20160224
C Bayly-Jones, D Bubeck and MA Dunstone	20160221	Computational studies of peptide-induced membrane pore formation	
Cryo-electron tomography: an ideal method to study membrane-associated proteins		R Lipkin and T Lazaridis	20160219
MA Dunstone and A de Marco	20160210	Design of self-assembling transmembrane helical bundles to elucidate principles required for membrane protein folding and ion transport	
Repurposing a pore: highly conserved perforin-like proteins with alternative mechanisms		NH Joh, G Grigoryan, Y Wu and WF DeGrado	20160214
T Ni and RJC Gilbert	20160212	Membrane-spanning α -helical barrels as tractable protein-design targets	
Assembly mechanism of the α -pore-forming toxin cytolysin A from <i>Escherichia coli</i>		A Niitsu, JW Heal, K Fauland, AR Thomson and DN Woolfson	20160213
D Roderer and R Glockshuber	20160211	Real-time dynamics of carbon nanotube porins in supported lipid membranes visualized by high-speed atomic force microscopy	
		Y Zhang, RH Tunuguntla, P-O Choi and A Noy	20160226
