Theme issue: Evolutionary causes and consequences of recombination rate variation in sexual organisms

	Article ID		Article ID
INTRODUCTION		The consequences of sequence erosion in the evolution of recombination hotspots	
Recombination: the good, the bad and the variable J Stapley, PGD Feulner, SE Johnston, AW Santure and CM Smadja	20170279	I Tiemann-Boege, T Schwarz, Y Striedner and A Heissl	20160462
ARTICLES		The Red Queen model of recombination hot-spot evolution: a theoretical investigation	
Variation in recombination frequency and distribution across eukaryotes: patterns and processes J Stapley, PGD Feulner, SE Johnston, AW Santure and CM Smadja	20160455	T Latrille, L Duret and N Lartillot	20160463
The impact of recombination on human mutation load and disease I Alves, AA Houle, JG Hussin and P Awadalla	20160465	Background selection as null hypothesis in population genomics: insights and challenges from <i>Drosophila</i> studies JM Comeron	20160471
Connecting theory and data to understand recombination rate evolution AL Dapper and BA Payseur	20160469	Recombination rate plasticity: revealing mechanisms by design LS Stevison, S Sefick, C Rushton and RM Graze	20160459
Coevolution between transposable elements and recombination TV Kent, J Uzunović and SI Wright	20160458	Are the effects of elevated temperature on meiotic recombination and thermotolerance linked via the axis and synaptonemal complex? CH Morgan, H Zhang and K Bomblies	20160470
Evolution of recombination rates between sex chromosomes D Charlesworth	20160456	What drives the evolution of condition-dependent recombination in diploids? Some insights from simulation modelling SR Rybnikov, ZM Frenkel and AB Korol	20160460
Low recombination rates in sexual species and sex–asex transitions CR Haag, L Theodosiou, R Zahab and T Lenormand	20160461	CORRECTIONS	
		Correction to 'Overexpression of plastid terminal oxidase in <i>Synechocystis</i> sp. PCC 6803 alters cellular redox state'	
		K Feilke, G Ajlani and A Krieger-Liszskay	20170277
