Theme issue: Heat shock proteins as modulators and therapeutic targets of chronic disease: an integrated perspective

	Article ID		Article ID
INTRODUCTION		Exercise, heat shock proteins and insulin resistance AE Archer, AT Von Schulze and PC Geiger	20160529
Heat shock proteins as modulators and therapeutic targets of chronic disease: an integrated perspective AL Edkins, JT Price, AG Pockley and GL Blatch	20160521	The role of heat shock proteins and co-chaperones in heart failure MJ Ranek, MJ Stachowski, JA Kirk and MS Willis	20160530
PART I: SETTING THE SCENE		Immune tolerance therapies for autoimmune diseases based on heat shock protein T-cell epitopes W van Eden	20160531
Extracellular cell stress (heat shock) proteins—immune responses and disease: an overview AG Pockley and B Henderson	20160522	Hsp90 and FKBP51: complex regulators of psychiatric diseases M Criado-Marrero, T Rein, EB Binder, JT Porter, J Koren III and LJ Blair	20160532
Protein moonlighting: what is it, and why is it important? CJ Jeffery	20160523	DNAJ Proteins in neurodegeneration: essential and protective factors C Zarouchlioti, DA Parfitt, W Li, LM Gittings and ME Cheetham	20160534
PART II: INTRACELLULAR VERSUS EXTRACELLULAR HEAT SHOCK PROTEINS IN CANCER		COMMENTS AND INVITED REPLIES	
Heat shock proteins and cancer: intracellular chaperones or extracellular signalling ligands? SK Calderwood	20160524	An Ediacaran pre-placozoan alternative to the pre-sponge route towards the Cambrian explosion of animal life: a comment on Cavalier-Smith 2017 SC Dufour and D Mclroy	20170148
The heat-shock, or HSF1-mediated proteotoxic stress, response in cancer: from proteomic stability to oncogenesis C Dai	20160525	Vendozoa and selective forces on animal origin and early diversification: reply to Dufour and Mclroy (2017) T Cavalier-Smith	20170336
Membrane heat shock protein 70: a theranostic target for cancer therapy M Shevtsov, G Huile and G Multhoff	20160526	CORRECTIONS	
Heat shock protein 90: its inhibition and function AD Zuehlke, MA Moses and L Neckers	20160527	Correction to 'Lost in transmission...?' J Lello and A Fenton	20170358
PART III: INTRACELLULAR VERSUS EXTRACELLULAR HEAT SHOCK PROTEINS IN CHRONIC DISEASES			
Therapeutic potential of heat shock protein induction for muscular dystrophy and other muscle wasting conditions SS Thakur, K Swiderski, JG Ryall and GS Lynch	20160528
