Discussion meeting issue: Allostery and molecular machines

	Article ID		Article ID
INTRODUCTION			
Allostery and molecular machines GH Lorimer, A Horovitz and T McLeish	20170173	Shared dynamics of LeuT superfamily members and allosteric differentiation by structural irregularities and multimerization L Ponzoni, S Zhang, MH Cheng and I Bahar	20170177
ARTICLES			
The nicotinic acetylcholine receptor: a typical 'allosteric machine' J-P Changeux	20170174	Signalling networks and dynamics of allosteric transitions in bacterial chaperonin GroEL: implications for iterative annealing of misfolded proteins D Thirumalai and C Hyeon	20170182
Ensemble allosteric model: energetic frustration within the intrinsically disordered glucocorticoid receptor JT White, J Li, E Grasso, JO Wrabl and VJ Hilser	20170175	The GroEL chaperonin: a protein machine with pistons driven by ATP binding and hydrolysis GH Lorimer, X Fei and X Ye	20170179
The 'allosteron' model for entropic allostery of self-assembly T McLeish, C Schaefer and AC von der Heydt	20170186	Substrate protein dependence of GroEL–GroES interaction cycle revealed by high-speed atomic force microscopy imaging D Noshiro and T Ando	20170180
Unpicking allosteric mechanisms of homo-oligomeric proteins by determining their successive ligand binding constants R Gruber and A Horovitz	20170176	Molecular switch-like regulation in motor proteins S Tafoya and C Bustamante	20170181
Interplay of self-association and conformational flexibility in regulating protein function M Garton, SS MacKinnon, A Malevanets and SJ Wodak	20170190	Intra-molecular pathways of allosteric control in Hsp70s MP Mayer	20170183
Folding cooperativity and allosteric function in the tandem-repeat protein class A Perez-Riba, M Synakewicz and LS Itzhaki	20170188	The substrate specificity of eukaryotic cytosolic chaperonin CCT KR Willison	20170192
A non-equilibrium approach to allosteric communication G Stock and P Hamm	20170187	CORRECTIONS	
Markov models for the elucidation of allosteric regulation U Sengupta and B Strodel	20170178	Correction to 'Migration in the Anthropocene: how collective navigation, environmental system and taxonomy shape the vulnerability of migratory species' M Hardesty-Moore, S Deinet, R Freeman, GC Titcomb, EM Dillon, K Stears, M Klope, A Bui, D Orr, HS Young, AM-t Kuile, LF Hughey and DJ McCauley	20180210
Ancient thioredoxins evolved to modern-day stability–function requirement by altering native state ensemble T Modi, J Huihui, K Ghosh and SB Ozkan	20170184
