Theo Murphy meeting issue: Evolution of pathogen and parasite avoidance behaviours

	Article ID		Article ID
INTRODUCTION		Feeding decisions under contamination risk in bonobos C Sarabian, R Belais and AJJ MacIntosh	20170195
Evolution of pathogen and parasite avoidance behaviours C Sarabian, V Curtis and R McMullan	20170256	The role of social cognition in parasite and pathogen avoidance M Kavaliers and E Choleris	20170206
ARTICLES		The structure and function of pathogen disgust V Curtis and M de Barra	20170208
How mammals stay healthy in nature: the evolution of behaviours to avoid parasites and pathogens BL Hart and LA Hart	20170205	Parasite insight: assessing fitness costs, infection risks and foraging benefits relating to gastrointestinal nematodes in wild mammalian herbivores G Coulson, JK Cripps, S Garnick, V Bristow and I Beveridge	20170197
Anti-parasite behaviour of birds SE Bush and DH Clayton	20170196	Consumption, contact and copulation: how pathogens have shaped human psychological adaptations D Lieberman, J Billingsley and C Patrick	20170203
Insect societies fight back: the evolution of defensive traits against social parasites C Grüter, E Jongepier and S Foitzik	20170200	Ectoparasite defence in humans: relationships to pathogen avoidance and clinical implications TR Kupfer and DMT Fessler	20170207
Both hygienic and non-hygienic honeybee, <i>Apis mellifera</i> , colonies remove dead and diseased larvae from open brood cells H Al Toufailia, SEF Evison, WOH Hughes and FLW Ratnieks	20170201	Why do people vary in disgust? JM Tybur, Ç Çınar, AK Karinen and P Perone	20170204
Parasite avoidance behaviours in aquatic environments DC Behringer, A Karvonen and J Bojko	20170202		
Neuronal and non-neuronal signals regulate <i>Caenorhabditis elegans</i> avoidance of contaminated food A Anderson and R McMullan	20170255
