## Theme issue: 5' and 3' modifications controlling RNA degradation

	Article ID	Article ID
<b>INTRODUCTION</b>		
5' and 3' modifications controlling RNA degradation: from safeguards to executioners D Gagliardi and A Dziembowski	20180160	The multitasking polyA tail: nuclear RNA maturation, degradation and export A Tudek, M Lloret-Llinares and TH Jensen 20180169
<b>ARTICLES</b>		
mRNA decapping: finding the right structures C Charenton and M Graille	20180164	Terminal nucleotidyl transferases (TENTs) in mammalian RNA metabolism Z Warkocki, V Liudkovska, O Gewartowska, S Mroczek and A Dziembowski 20180162
Human RNA cap1 methyltransferase CMTr1 cooperates with RNA helicase DHX15 to modify RNAs with highly structured 5' termini D Toczydlowska-Socha, MM Zielinska, M Kurkowska, Astha, CF Almeida, F Stefaniak, E Purta and JM Bujnicki	20180161	The role of 3' end uridylation in RNA metabolism and cellular physiology D Zígáčková and Šěpánka Vaňáčková 20180171
mRNAs biotinylated within the 5' cap and protected against decapping: new tools to capture RNA–protein complexes S Bednarek, V Madan, PJ Sikorski, R Bartenschlager, J Kowalska and J Jemielity	20180167	RNA uridylation and decay in plants C de Almeida, H Scheer, A Gobert, V Fileccia, F Martinelli, H Zuber and D Gagliardi 20180163
RNA polyadenylation and its consequences in prokaryotes E Hajnsdorf and VR Kaberdin	20180166	Role of oligouridylation in normal metabolism and regulated degradation of mammalian histone mRNAs SA Meaux, CE Holmquist and WF Marzluff 20180170
		Fidelity in RNA-based recognition of transposable elements I Ugolini and M Halic 20180168
